INVESTIGATION REPORT

CASE NUMBER:	22CARRU129712 / CF222480003
CASE NAME:	FAIRVIEW
DATE:	September 5, 2022
INCIDENT TYPE:	Wildland Fire / Death Investigation
INCIDENT INVESTIGATORS:	John MAY, Peace Officer – RRU *CASE AGENT*

Ken MEINKE, Peace Officer – RRU
Joe GREEN, Peace Officer – RRU
Wayne HOWERTON, Peace Officer – CSR
Tim CABRAL, Peace Officer – RRU
Mike NELSON, Peace Officer – RRU
Kory MCGRANAHAN, Peace Officer – RRU
Francis BURKHART, Peace Officer – BDU
Jace CHAPIN, Peace Officer – CSR
Kelly BECKER, Peace Officer – RRU

1-VIOLATIONS

1 – VIOLATIONS:

PENAL CODE § 192 (b)

Manslaughter is the unlawful killing of a human being without malice.

PENAL CODE § 452 (a)

A person is guilty of unlawfully causing a fire when he recklessly sets fire to or burns or causes to be burned, any structure, forest land or property.

PENAL CODE § 452 (b)

A person is guilty of unlawfully causing a fire when he recklessly sets fire to or burns or causes to be burned, any structure, forest land or property.

PENAL CODE § 452 (c)

A person is guilty of unlawfully causing a fire when he recklessly sets fire to or burns or causes to be burned, any structure, forest land or property.

PENAL CODE § 452 (d)

A person is guilty of unlawfully causing a fire when he recklessly sets fire to or burns or causes to be burned, any structure, forest land or property.

PENAL CODE § 454 (a)(2)

(a) Every person who violates Section 451 or 452 during and within an area of any of the following, when proclaimed by the Governor, shall be punished by imprisonment in the state prison, as specified in subdivision (b):

(2) A state of emergency pursuant to Section 8625 of the Government Code.

PUBLIC RESOURCES CODE § 4421

A person shall not set fire or cause fire to be set to any forest, brush, or other flammable material which is on any land that is not his own, or under his legal control, without the permission of the owner, lessee, or agent of the owner or lessee of the land.

PUBLIC RESOURCES CODE § 4422 (b)

A person shall not do any of the following:

(b) Allow any fire kindled of attended by him to escape from his control or to spread to the land of any person other than from the land from which the fire originated.

HEALTH & SAFETY CODE § 13000

Every person is guilty of a misdemeanor who allows a fire kindle or attended by him to escape from his control or to spread to the lands of any person other than the builder of the fire without using every reasonable and proper precaution to prevent the fire from escaping.

HEALTH & SAFETY CODE § 13001

Every person is guilty of a misdemeanor who, through careless or negligent action, throws or places any lighted cigarette, cigar, ashes, or other flaming or glowing substance, or any substance or thing which may cause a fire, in any place where it may directly or indirectly start a fire, or who uses or operates a welding torch, tar pot or any other device which may cause a fire, who does not clear the inflammable material surrounding the operation or take such other reasonable precautions necessary to insure against the starting and spreading of fire.

PUBLIC UTILITIES CODE § 8386 (a)

(a) Each electrical corporation shall construct, maintain, and operate its electrical lines and equipment in a manner that will minimize the risk of catastrophic wildfire posed by those electrical lines and equipment.

GENERAL ORDER 95, 31.1: DESIGN, CONSTRUCTION and MAINTENANCE

Electrical supply and communication systems shall be of suitable design and construction for their intended use, regard being given to the conditions under which they are to be operated and shall be maintained in a condition which will enable the furnishing of safe, proper, and adequate service.

2-SUMMARY

2 - SUMMARY:

On Monday, September 5, 2022, at approximately 3:35 PM, the California Department of Forestry and Fire Protection (CAL FIRE) / Riverside County Fire Department (RCoFD) responded to a wildland fire located near Fairview Avenue and Bautista Canyon Road in the unincorporated area of Hemet, County of Riverside. The wildland fire, later known as the Fairview Fire, originated on the property of [redacted] Hemet, CA, 92544.

The fire originated under a powerline owned and operated by Sothern California Edison (SCE). The powerline ran up a north facing slope on the property at [redacted] The SCE poles had two energized overhead electrical lines on a cross arm and a communication line underneath in the center of the pole. The east electrical line sagged substantially lower than the west electrical line. The sag or slack in the east electrical line caused the energized electrical line to contact the Frontier communication line causing an electrical arch and a shower of sparks to fall, igniting the vegetation below. The Fairview Fire was reported at approximately 3:37 PM to the RCoFD Emergency Command Center. Law Enforcement Officer Ken MIENKE and I responded to the location of the wildland fire, arriving at approximately 4:33 PM.

On Wednesday, September 7, 2022, at 8:00 AM, Law Enforcement Officer Kory MCGRANAHAN was assigned to the lead on the origin and cause investigation team assisted by Law Enforcement Officers Ken MEINKE, Moe BURKHART, Jace CHAPIN and Tim CABRAL. It was determined the SCE energized overhead electrical line contacted a Frontier communication line that was suspended underneath the electrical lines. This caused a shower of sparks, which caused the fire. A violation of General Order 95, 31.1; Design, Construction, and Maintenance.

The fire ultimately consumed 28,098 acres of land, damaged or destroyed 42 structures killed [redacted] The fire caused great bodily injury to [redacted]

3-SUSPECTS

3 - SUSPECTS:

S-1 Southern California Edison (SCE)
2244 Walnut Grove Avenue
Rosemead, CA 91770
Phone: (888) 848-4754

4-VICTIMS, WITNESSES & OTHERS

4 - VICTIMS, WITNESSES & OTHERS:

VICTIMS:

V-1 [redacted]

[redacted]

DOB: [redacted]

For information pertaining to the death investigation associated with [redacted]
refer to Riverside County Sheriff's Case # D222480077. (See attachment #22)

V-2 [redacted]

[redacted]

DOB: [redacted]

For information pertaining to the death investigation associated with [redacted]
refer to Riverside County Sheriff's Case # D222480077. (See attachment #22)

V-3 [redacted]

[redacted]

DOB: [redacted]

[redacted]

V-4 [redacted]

[redacted]

[redacted]

Pilot of Blue Sky Helicopter, [redacted]

V-5 [redacted]

[redacted]

Passenger on Blue Sky helicopter [redacted]

V-37 [redacted]

Suffered a loss of property from the Fairview Fire.

.

V-38 [redacted]

Suffered a loss of property from the Fairview Fire.

All victims associated with property damage on the Fairview Fire, are captured in the Damage Inspection Report (DINS) *(see attachment #10)*.

WITNESSES:

W-1 [redacted]

Phone: [redacted]

Can testify to [redacted] *driving to the south end of Fairview Ave.* [redacted]

W-2 [redacted]

Phone: [redacted]

Can testify to [redacted]

W-3 [redacted]

Phone: [redacted]

Can testify to [redacted] *providing photographs.* [redacted]

W-4 [redacted]

Phone: [redacted]

Can testify to [redacted]

W-5 [redacted]

Phone: [redacted]

Can testify to being the owner of the property at [redacted]

permission to search, provided contact name for early-stage photograph.

W-6 [redacted]

Phone: [redacted]

Can testify giving surveillance video to Daniel BYRNES.

W-7 [redacted]

Phone [redacted]

Can testify to being at [redacted] *on September 5, 2022, driving a green truck. License Plate -* [redacted]

W-8 [redacted]

Phone: [redacted]

Can testify to photo taken from neighborhood media.

W-9 [redacted]

Phone: [redacted]

Can testify to provided photo's photos from back yard.

OTHERS:

O-1 John MAY
CAL FIRE
Peace Officer #2319
CAL FIRE Riverside Unit
210 W. San Jacinto Ave.
Perris, CA 92570
Phone: [redacted]
Case agent.

O-2 Ken MEINKE
CAL FIRE
Peace Officer #3327
210 W. San Jacinto Ave.
Perris, CA 92570
Phone: [redacted]
Can testify to assisting with the origin and cause investigation associated with the Fairview Fire and the fire progression.

O-3 James GREEN
CAL FIRE
Peace Officer #4305
210 W. San Jacinto Ave.
Perris, CA 92570
Phone: [redacted]
Can testify to witness statements, review of surveillance video and photos taken during evidence collection.

O-4 Kory MCGRANAHAN
CAL FIRE
Peace Officer #4010
210 W. San Jacinto Ave.
Perris, CA 92570
Phone: [redacted]
Can testify as the Lead of the origin and cause investigation team and author of the origin and cause report.

O-5 Francis BURKHART
CAL FIRE
Peace Officer #4490
3800 North Sierra Way
San Bernardino, CA 92405
Office: [redacted]
Can testify to assisting with the origin and cause investigation associated with the Fairview Fire and correspondence with Riverside County Regional Park and Open-Space District.

O-6 Jace CHAPIN
CAL FIRE
Peace Officer #3816
1234 East Shaw Avenue
Fresno, CA 93710
Phone: [redacted]
Can testify to assisting with the origin and cause investigation associated with the Fairview Fire.

O-7 Wayne HOWERTON
CAL FIRE
Peace Officer #3658
1234 East Shaw Avenue
Fresno, CA 93710
Phone: [redacted]
Can testify to review of video footage and interviews of 9-1-1 callers.

O-8 Kelly BECKER
CAL FIRE
Peace Officer #3298
210 W. San Jacinto Ave.
Perris, CA 92570
Phone: [redacted]
Can testify to interviews of residents in the vicinity of origin.

O-9 Mike NELSON
CAL FIRE
Peace Officer #4853
210 W. San Jacinto Ave.
Perris, CA 92570
Phone: [redacted]
Can testify to collection of video footage from a traffic camera and scene security at the civilian burn over.

O-10 Tim CABRAL
CAL FIRE
Peace Officer #4920
210 W. San Jacinto Ave.
Perris, CA 92570
Phone: [redacted]
Can testify to assisting with the origin and cause investigation associated with the Fairview Fire.

O-11 Eric OTERO
CAL FIRE
Fire Apparatus Engineer
210 W. San Jacinto Ave.
Perris, CA 92570
Phone: [redacted]
First arriving company officer.

O-12 Anthony ALESI
CAL FIRE
Fire Captain
210 W. San Jacinto Ave.
Perris, CA 92570
Phone: [redacted]
Second arriving company officer and CALFIRS report author.

O-12 Daniel BYRNES
Riverside County Fire Department
RRU System Administrator
210 W. San Jacinto Ave.
Perris, CA. 92570
Office: [redacted]
Can testify to downloading video from [redacted]

O-13 Josh RHODES
Riverside County Sheriff's Office
Investigator #3320
Riverside County Sheriff's Department
43950 Acacia Ave.
Hemet, CA 92544
Phone: [redacted]
Riverside County Sheriff Investigator assigned to the case.

O- 14 Bernice CORDERO
Southern California Edison
PO Box 900
Rosemead, CA 91770
Phone: [redacted]
Southern California Edison Senior Supervisor.

O-15 Pablo SOTO
Southern California Edison
PO Box 900
Rosemead, CA 91770
Crew Foreman for the line removal crew.

O-16 Mario ESTRADA
Southern California Edison
PO Box 900
Rosemead, CA 91770
Lineman who removed the Edison lines, associated equipment from pole 1 and assisted in rolling the RED Phase line.

O-17 Ethan CASTEEL
Southern California Edison
PO Box 900
Rosemead, CA 91770
Lineman who assisted with removal of the Edison lines and associated equipment.

O-18 Brandon BLYTHE
Southern California Edison
PO Box 900
Rosemead, CA 91770
Lineman who removed the Edison lines and associated equipment from pole 2.

O-19 Santiago NECOCHEA
Southern California Edison
PO Box 900
Rosemead, CA 91770
Groundman who assisted the lineman with removal of the Edison lines, associated equipment and assisted in rolling the BLUE Phase line.

O-20 Daniel RAMIREZ
Southern California Edison
PO Box 900
Rosemead, CA 91770
Crew Foreman for the groundman.

O-21 Rudy ALVAREZ
Southern California Edison
PO Box 900
Rosemead, CA 91770
Groundman that assisted with rolling the RED Phase line once removed from the pole.

O-22 Will HUERTA
Southern California Edison
PO Box 900
Rosemead, CA 91770
Groundman that assisted with rolling the BLUE Phase line once removed from the pole.

O-23 Andrew BANKS
Fee Investigations
1275 N. White Ave.
Pomona, CA 91768
Phone: [redacted]
Sothern California Edison fire investigator.

O-24 Kristin MALDANADO
Frontier Communications
32477 Haun Rd.
Menifee, CA 92584
Phone: [redacted]
Frontier Communications Director of engineering and construction.

O-25 Bryan SPITULSKI
Envista Forensics
4044 Clipper Ct.
Fremont, CA 94538
Phone: [redacted]
Frontier Communications fire investigator.

O-26 Erik WALRAVEN
Frontier Communications
32477 Haun Rd.
Menifee, CA 92584
Supervisor that coordinated the removal of Frontier's C Rural wire and strand wire.

O-27 John LARA
Frontier Communications
32477 Haun Rd.
Menifee, CA 92584
Removed Frontier's C Rural wire and strand from pole 1.

O-28 Michael BERGERON
Frontier Communications
32477 Haun Rd.
Menifee, CA 92584
Removed Frontier's C Rural wire and strand from pole 2.

O-29 Albert NERI
Frontier Communications
32477 Haun Rd.
Menifee, CA 92584
Rolled and secured the C Rural wire.

O-30 Evan HARLACHER
Frontier Communications
32477 Haun Rd.
Menifee, CA 92584
Rolled and secured the strand wire.

O-31 Triston MCMULLEN
Element Security Solutions, Inc.
66 East Escalon Avenue
Fresno, CA 93710
Office: [redacted]
Can testify to scene security for the Fairview Fire (see attachment #17).

O-32 Katarina JARVIS
Element Security Solutions, Inc.
66 East Escalon Avenue
Fresno, CA 93710
Office: [redacted]
Can testify to scene security for the Fairview Fire (see attachment #17).

O-33 Dave KAROLY
CAL FIRE
Technical Services Section
Survey Party Chief – CAL FIRE
1131 S Street
Sacramento, CA 95811
Office: [redacted]
Can testify to LIDAR associated the FAIRVIEW fire (see attachment #16).

O-34 Nicholas HANCOCK
CAL FIRE
Technical Services Section
Land Surveyor – CAL FIRE
1131 S Street
Sacramento, CA 95811
Office: [redacted]
Can testify to LIDAR associated the FAIRVIEW (see attachment #16).

O-35 Shane DANIEL
CAL FIRE
Technical Services Section
Land Surveyor – CAL FIRE
1131 S Street
Sacramento, CA 95811
Office: [redacted]
Can testify to LIDAR associated the FAIRVIEW (see attachment #16).

5-EVIDENCE

5 - EVIDENCE:

The physical evidence associated with the cause of the Fairview Fire was collected on Monday, September 12, 2022, by Kory MCGRANAHAN. The physical evidence was tagged and bagged by Kory MCGRANAHAN and numbered Item -1 through Item -16. The physical evidence was secured in Ariel SOSA's and Francis BURKHART's locked/marked CAL FIRE vehicle. All physical evidence collected on the Fairview Fire was transferred to the CAL FIRE evidence storage.

PHYSICAL EVIDENCE

Item-1 – Miscellaneous pieces of metal

Item-2 – Material collected by a magnet.

Item-3 - 400' of Communication line (Strand wire).

Item -4 – 400' C Rural wire

Item- 5 – A Down Guy

Item-6 – associated hardware

Item-7 – 400' #2 Aluminum Conductor Steel Reinforced (ACSR)

Item-8 – 400' #2 Aluminum Conductor Steel Reinforced (ACSR)

Item-9 – 10' crossarm

Item-10 – 10' crossarm w/ insulators

Item-11 - 2 x polymer insulators

Item-12 – A Down Guy

Item-13 – Edison preform

Item-14 – SD card from video camera located at Fairview Avenue x Bautista Canyon Road

Item-15 – Black USB drive containing surveillance video from [redacted]

Item-16 – Silver 1 TB USB drive containing digital audio and digital photographs.

6-PHYSICAL CONDITION OR CONDITIONS

6 – PHYSICAL CONDITION OR CONDITIONS:

The origin of the Fairview Fire was on rocky terrain with brush and annual grasses. The Fairview fire's origin is located at [redacted] Hemet, CA 92544. The fire was between two structures located on the property accessed at the end of Fairview Avenue. The topography in the area is steep leading upward toward the southeast. When I arrived at [redacted] I observed strong winds out of the northeast, pushing the fire to the west into Avery Canyon.

Weather information for Monday, September 5, 2022, was obtained from a Remote Automated Weather Station (RAWS) located at 46024 Bautista Rd. The SCE Bautista Creek (156SE) RAWS is approximately 1.8 miles east of the Fairview Fire's origin. The SCE Bautista Creek RAWS is owned and operated by SCE. The SCE Bautista Creek RAWS recorded weather every 10 minutes. The start time of the Fairview Fire was approximately 3:30 PM. *(see attachment #14 and #15)*.

SCE Bautista Creek (156SE) RAWS

Date:	Monday, September 5, 2022
Time:	3:30 PM
Temperature:	102.7 degrees Fahrenheit
Relative Humidity:	16.27 percent
Wind Speed:	10 to 20 miles per hour.
Wind Direction:	From the northeast
GPS Coordinates:	33,70725 – 116, 85673
Elevation:	2152 feet

7-VEHICLES/EQUIPMENT

7 – VEHICLE(S)/EQUIPMENT:

The equipment associated with the cause of the Fairview Fire is owned and operated by SCE. The fire originated closest to Pole #220029S. Pole #220029S is the last pole on the Sprague 12 KV circuit. The roadside / east phase sagged significantly more than the field / west phase between pole #493353E and pole #220029S. The east and west energized electrical lines was suspended over multiple rocks and brush throughout the span from pole #493353E and Pole #220029S. The conductor was #2 Aluminum Conductor Steel Reinforced (ACSR). The conductor was along the Sprague 12 KV circuit originating from Mayberry substation in Hemet, CA.

8-PROPERTY

8 – PROPERTY:

The origin of the Fairview Fire was located at [redacted] Hemet, CA 92544. The property is accessed through two locked gates at the south end of Fairview Avenue. The origin of the Fairview fire was located on property identified by Assessor's Parcel Number (APN) [redacted] The Riverside County Assessor's Office list the property as a 60-acre parcel. The property owner's address and contact information is as follows:

Property Owner Information – *(see attachment #2)*

[redacted]

Phone: [redacted]

9-NARRATIVE

9 - NARRATIVE:

On Monday, September 5, 2022, at approximately 3:35 PM, the California Department of Forestry and Fire Protection (CAL FIRE) / Riverside County Fire Department (RCoFD) responded to a wildland fire located at [redacted] in the unincorporated area of Hemet, County of Riverside. At approximately 4:05 PM, I responded with Ken MIENKE to conduct the origin and cause investigation.

I arrived at the Incident Command Post located at Fairview Avenue and Bautista Canyon Road at approximately 4:33 PM. I met with the Incident Commander Andrew BENNETT. BENNETT stated the fire started on the property at the end of the dirt section of Fairview Avenue where fire crews were actively engaged with suppression efforts.

I drove to the property with the address of [redacted] The fire was burning in a canyon moving in a westerly direction at a fast rate of spread. I approached the property and observed a large metal garage type building. I observed overhead electrical lines that transitioned up the hill to a small residential house from the metal garage type building. MEINKE and I decided to drive his department vehicle to the house to get a better advantage point. The fire had consumed the vegetation surrounding the house. I observed overhead electrical lines terminated at the house, the drop line was not connected to the power lines, and the electrical meter had been pulled from the panel. I slid open an unlocked slider door to check if there were any occupants in the house. No occupants were found in the house.

MEINKE and I entered the fire scene from the house and walked counterclockwise, west along the mid slope dirt road that descended into a canyon and continued up the slope across from the house observing large or macro burn indicators. I observed no indications of foot traffic or vehicle tire marks along the dirt road. I observed a retardant drop west of the house extending toward the bottom of the canyon. MEINKE and I observed a cabinet and what appeared to be shell casings, a shooting platform, and

target stands in the bottom of the canyon. Fire Captain Tony ALESI contacted MEINKE and I near the peak of the slope. ALESI told us the following in summary: When he arrived, the fire was approximately 20 acres and was rapidly burning to the west through the canyon. When he arrived, he made access to the property at [redacted] through two locked gates. He observed the fire established in the bottom of the canyon near a stand of oak trees. ALESI stated that he observed a bench and a cabinet in the bottom of the canyon as he walked through the canyon to start the hose lay on Division X. MEINKE and I walked back to his vehicle in a clockwise direction observing large or macro burn indicators. MEINKE and I relocated the vehicle to the bottom of the canyon where the fire equipment was located. I walked into the canyon and observed a bench with rifle sandbags and discharged ammunition casings surrounding the area. Adjacent to the bench was a stool and a metal cabinet. On the opposite side of the canyon, I observed a target stand and multiple propane type cylinders with holes in them from projectiles. The canyon floor had a large amount of discharged ammunition casings scattered throughout. MEINKE placed white flags on the discharged shell casings, target stand and propane tanks throughout the canyon. The area was cordoned off with yellow crime scene tape to restrict access into the drainage. It was later determined these items were not associated with the ignition of the fire. See MEINKE's supplemental report. *(see attachment # 1)*

I heard a Riverside County Sheriff Deputy (RSO) request a CAL FIRE investigator over the radio to secure the scene of the fire fatalities. I contacted Mike NELSON and had him contact RSO's dispatch regarding the request. See NELSONS attached supplemental report. (*Attachment # 2*) NELSON informed me about the two fire fatalities at the address of [redacted] and I requested RSO investigators through the Incident Commander.

At approximately 11:30 PM, MEINKE and I relocated to the intersection of State Street and Gibbel Road to attend a briefing with NELSON, RSO investigators and the Central Homicide Unit liaison. It was determined by RSO that the local Hemet Station investigators and the Coroner's Office would lead the death investigation.*(see*

attachment # 22) RSO Investigator Josh RHODES was assigned and asked MEINKE and I to return at 7:00 AM to assist. RSO deputies secured the scene of the fire fatalities for the duration of the night. MEINKE and I returned to [redacted] to ensure the scene was not compromised, which it was not.

Day Two - Tuesday September 6, 2022

At approximately 6:30 AM, MEINKE and I returned to [redacted] with RSO investigators and the RSO Coroner. The property was located approximately [redacted] The property is up slope from the [redacted] The driveway is approximately 660 feet long. [redacted] I took photos of the burn indicators and surrounding landscape that illustrated the progression of the fire through [redacted] Road. (See P-JM-29 thru P-JM-37) included in MEINKES supplemental report. *(see attachment # 3)*

At approximately 9:00 AM, after completion of the fire progression determination at the fatality site, MEINKE and I returned to meet with CAL FIRE Peace Officers Kelly BECKER and Wayne HOWERTON at [redacted]. BECKER and HOWERTON relieved MEINKE and I. BECKER and HOWERTON remained at scene to maintain scene security. See HOWERTONS supplemental report. *(see attachment # 5)*

MEINKE and I returned to the CAL FIRE Perris Office to request and review 911 call logs, dispatch records, and the Riverside County Accessors reports for the property at [redacted]

At approximately 5:15 PM, HOWERTON advised the fire was burning towards the property at [redacted] from the southeast with limited fire resources assigned. CAL FIRE Peace Officer Joe GREEN, MEINKE, BECKER, and I responded

to [redacted] to ensure the property and evidence was not damaged or destroyed. I made the decision to photographically document the shell casings, cabinet, and items in the canyon before they were potentially destroyed by the fire's advancement. *(See P-JM-01 through P-JM-28).*

At approximately 10:15 PM, Element Security, a state contracted scene security company arrived. The security company is familiar with scene preservation and would be establishing twenty-four hour scene security. The security guard was briefed on the specific needs at [redacted] by HOWERTON. CAL FIRE Officers were released for the night.

Day Three – Wednesday, September 7, 2022

At approximately 8:00 AM, I arrived at [redacted] to conduct a briefing and to assign officers to specific duties. I assigned CAL FIRE Peace Officer Kory MCGRANAHAN as the origin and cause investigation lead. Assigned to the origin and cause investigation team was CAL FIRE Peace Officers Jace CHAPIN, Tim CABRAL, Ken MEINKE, and Francis BURKHART.

CAL FIRE Peace Officers Joe GREEN and Wayne HOWERTON were assigned to review video footage and interviews of 911 Callers. See GREENS supplemental report *(see attachment # 4)* and HOWERTONS supplemental report. *(see attachment # 5)*

At approximately 10:00 AM, HOWERTON advised me that a representative from SCE was at scene. HOWERTON introduced me to Bernice CORDERO, who stated she was the claims investigation senior advisor. CORDERO stated that SCE had restored power to the metal building at the base of the hill. SCE had pulled the fuses on pole 4943353E which fed power up to the residence on the hill side. CORDERO confirmed that the overhead lines were no longer energized running up the hill past pole #4943353E. CORDERO also requested that on Thursday, September 8, 2022, at approximately 9:00 AM, SCE would like to use LiDAR to map the scene under the power lines.

At approximately 1:00 PM, I relocated to Riverside County Fire Station # 72 at 25175 Fairview Avenue for paperwork and to have cellular service. I returned to [redacted] at approximately 4:15 PM to check on the progress of the origin and cause team. I spoke with MCGRANAHAN who explained the origin investigation was complete. MCGRANAHAN later determined the fire was caused by overhead energized lines contacting during a period of wind. See MCGRANAHAN'S origin and cause report. *(see attachment # 1)*

Day Four – Thursday, September 8, 2022

At approximately 8:00 AM I conducted a briefing at the CAL FIRE Perris Office. I assigned HOWERTON, CHAPIN, and BURKHART to maintain the scene preservation while SCE was at the origin conducting LiDAR.

Day Five – Friday, September 9, 2022

At approximately 8:00 AM HOWERTON, CHAPIN, and BURKHART arrived at the origin to maintain the scene preservation while the CAL FIRE Land Survey Team conducted LiDAR and drone footage. At approximately 11:00 AM, I was contacted by BURKHART via cellular phone advising that he had witnessed the overhead lines contact each other multiple times while waiting for the CAL FIRE LiDAR team. BURKHART recorded the event on his department cellular phone. See BURKHART'S supplemental report. *(see attachment # 6)*. I used the MesoWest Data website to obtain the 24-hour weather from the remote automated weather station (RAWS), SCE Bautista Creek station #156SE. The data was obtained for September 4th through September 5th and September 8th through September 9th. *(see attachment # 14 and attachment # 15)*

Day Six – Saturday, September 10, 2022

On Saturday September 10, 2022, at approximately 08:00 AM, I arrived at the CAL FIRE Perris Office to continue the investigation and documentation for the report. At approximately 1:00 PM, MCGRANAHAN, MEINKE, and CABRAL returned to [redacted] to reexamine the origin after a weather system had developed over the larger area. At approximately 3:52 PM, a contracted helicopter assigned to the Fairview Fire, Blue Sky Helicopter tail number N242BH suffered a crash on approach to the Banning Airport. [redacted]

CABRAL and MIENKE responded to Banning Airport to secure the scene.

Day Seven – Sunday, September 11, 2022

On Sunday September 11, 2022, at approximately 9:00 AM, I arrived at the CAL FIRE Perris Office to continue to gather the documentation for the report.

Day Eight – Monday, September 12, 2022

On Monday September 12, 2022, at approximately 09:00 AM, I arrived at [redacted] to observe the collection of evidence. At approximately 10:00 AM SCE representatives, Frontier Communications representatives, MCGRANAHAN,GREEN, BURKHART, SOSA and I met to determine the most appropriate process to remove and secure the overhead evidence. It was decided by MCGRANAHAN that rolled plastic sheeting would be placed on the dirt roadway to protect the integrity and minimize contamination of the evidence. Frontier employees disconnected, secured, and lowered their equipment involved in the sequence of ignition at the direction of CAL FIRE officers. CAL FIRE officers walked the evidence and placed it securely on the plastic sheeting. GREEN photographed the collection of evidence. After Frontier disconnected their equipment SCE repositioned their boom trucks to remove their overhead lines.

SCE employees disconnected, secured, and lowered their equipment involved in the sequence of ignition at the direction of CAL FIRE officers. CAL FIRE officers walked the evidence and placed it securely on the plastic sheeting next to the Frontier equipment. GREEN photographed all evidence and damage with it laying on the plastic sheeting. See GREEN'S supplemental report. *(see attachment # 4)* Frontier and SCE representatives were allowed to visually examine the evidence on the plastic. No SCE or Frontier representatives were allowed to touch the evidence. CAL FIRE officers moved the evidence as needed for Frontier and Edison. CAL FIRE officers secured and protected any areas of interest with bubble wrap. SCE and Frontier linemen assisted CAL FIRE officers in rolling and securing the evidence for transportation. The evidence was transported in CAL FIRE vehicles and secured into the evidence room by MCGRANAHAN and MAY.

Opinion and Conclusion

Based on my training and experience, the origin and cause investigation findings, interviews, videos, evidence collected and weather observations, I have determined that SCE failed to properly maintain the overhead electrical lines. The Fairview Fire was a result of a low hanging overhead energized electrical line contacting a Frontier communication wire underneath, causing a shower of sparks igniting the vegetation below. This resulted in the burning of 28,098 acres of land, damaged or destroyed 42 structures, and caused the deaths of [redacted]

DAY	MONTH	DATE	YEAR	COUNTY	REGION	UNIT	CASE NUMBER
Wed	09	08	2022	Riverside	CSR	RRU	CF222480003

On Wednesday, September 7, 2022, at approximately 8:15 AM, I reported to the area of Fairview Ave. south of Bautista Canyon Rd near [redacted] in the unincorporated area of Hemet. Officer John MAY was conducting an investigative briefing of the Fairview fire. MAY assigned me to lead the Origin and Cause investigation team. The team members of the Origin and Cause investigation team were all CAL FIRE Law Enforcement Officers. The following officers were assigned:

Investigative Team Members

Ken MEINKE, Riverside Unit
Tim CABRAL, Riverside Unit
Francis "Moe" BURKHART, San Bernadino Unit
Jace CHAPIN, Southern Region
Wayne Howerton, Southern Region

Prior to my arrival, Officers John MAY, Ken MEINKE and Kelly BECKER, locked down the scene where the fire started. The area which was designated a crime scene was multiple acres and included the area later identified and the General Origin Area (GOA). Items of interested were marked and other preliminary investigative measures were taken by the investigators prior to my arrival.

I noted the area was secured by Element security with an armed guard. I met with MEINKE who briefed me to some of the prior investigative activities. MEINKE told me he and MAY went to the fire scene on Monday September 5, 2022, and arrived at approximately 4:35 PM, MEINKE told me about two separate areas where he and MAY identified as areas of interest that need further examination. The first area he identified was the drainage southwest of the main house located at [redacted] (P-KM07-10). MEINKE stated he believed the area was used as an area where target shooting occurred. MEINKE identified a second area south of the main house near a small structure (PKM13-14). MEINKE stated that area burned, and power lines were above that area.

OFFICERS INITIALS [redacted]

Origin and Cause investigative briefing

I conducted a briefing with all members of the investigative team at approximately 9:30 AM September 7,2022. When I conducted the briefing, present at the Briefing was MEINKE, BURKHART, CHAPIN, HOWERTON and the case agent Officer John May. I instructed MEINKE, BURKHART, CHAPIN and HOWERTON to conduct a separate and independent examination of the area. Those officers and I conducted an independent examination of the area. All members reconvened at approximately 10:30 AM. Based on the observations of team members, I assigned CHAPIN and BURKHART to continue examining the area of the power lines. MEINKE and CABRAL were assigned to continue examining the drainage southwest of the main house. During the initial briefing, MEINKE relayed the initial actions of MEINKE and MAY when they arrived after their initial dispatch. Additionally, they identified an area which needed further investigation in the drainage southwest of [redacted] MEINKE and MAY informed me they found evidence in the that area which led them to believe the drainage was used for target shooting. MEINKE and MAY stated they had placed white flags to indicated items of interest.

Origin and Cause

CHAPIN and BURKHART examined the scene near the power lines and MEINKE and CABRAL continued to investigate the area in and around the drainage. I initially joined MEINKE and CABRAL and determined the fires general direction using macro indicators. I observed multiple white flags indicating items of interest (P-KM09, P-KM10, P-KM15, P-KM16). During my initial observations I found multiple macro indicators which showed the fire moving northwest through the drainage and up the north side of the drainage (P-KM20).

At approximately 1:00 PM, I joined CHAPIN near the power lines. I identified indicators showing advancing fire indicators toward the drainage. I also did an initial inspection of the powerlines and equipment just north of the guest house. While observing the power lines, I observed an area which appeared to be damaged on the lower unsheathed line. I attempted to capture the possible damage in picture P-KM11.

I rejoined MEINKE and CABRAL who were continuing to examine fire direction indicators in the drainage. I identified indicators which showed the fire enter the drainage from the southeast (P-KM72 through P-KM84). After assessing the macro indicators in and around the drainage, the

OFFICERS INITIALS [redacted]

north and south side of the drainage, the casings and shooting related items, I determined the fires origin was southwest of the drainage.

After identifying the fire's movement into the drainage, the indicators found led us to the area near the guest house located at [redacted] We continued to assess fire indicators and came upon an area north of the guest house and almost directly under a set of power lines which I identified as the GOA. The area of the GOA was approximately 20' wide and 20' long. The approximate location of the GOA identified was ([redacted].
Backing fire direction indicators were found on the east side of the GOA as seen in P-KM49.
Lateral fire direction indicators were found on the north and south side of the GOA(P-KM51).
Advancing fire direction indicators were found on the west side of the GOA(P-KM50).

Once a GOA was identified a comprehensive investigation of micro indicators were searched for. After a search for micro indicators, I did not note any conclusive indicators which identified a Specific Origin Area (SOA). Additionally, I did not find clusters of micro indicators or other conclusive micro indicators which lead me to identify a SOA. Based on the lack of clustered micro indicators and the area of the GOA being so large I chose not to use a grid type search and instead did a line search. MEINKE, CABRAL, BURKHART and I conducted the line search. I collected a small amount of ferrous material.

The scene was left secured for further investigation in the following days by Element Security.

Prior to leaving, I noted a Southern California Edison marked vehicle just north of the main house located at [redacted] on the dirt extension of [redacted] While driving down the hill, I noticed the rear passenger exit the vehicle and walk east into the brush. He collected what appeared to be a mylar type balloon. I stopped behind the vehicle. I was addressed by a female who later identified herself as Bernice Cordero, an Edison Senior Advisor. I introduced myself as a CAL FIRE Law Enforcement Officer. I asked her if they were collecting evidence. She and both other passengers stated no. I asked if anyone had collected any evidence and she said no. The back seat male passenger stated they were picking up trash.

On September 9, 2022, at approximately 12:30 PM, I arrived at the GOA to further photograph the GOA and areas surrounding. I noted the area was secured by an armed guard from Element

OFFICERS INITIALS [redacted]

Security company. While continuing my observations, I noted additional macro indicators which I photographed. While standing just west of the guest house, I noted a large stand of trees near the drainage approximately 200 yards to the west (P-KM72,73,75).

I also noted a stand of trees on the hillside mid-slope south of the drainage (P-KM74,76). I looked at the area in between the stands of trees and found an area which showed a high degree of consumption due to advancing fire.

I then hiked west to further gather additional fire direction indicators which supported where the fire originated. I observed additional indicators which show the fire moving from the GOA to the west. These indicators include protection, sooting and staining as seen in P-KM77,78,79,81,82,83,84. Upon considering my observations and totality of indicators present, this evidence further confirms the accuracy of the GOA established. After my continued investigation, a weather system carrying higher winds and rain passed through the area.

On September 10, 2022, at approximately 1:00 PM, I arrived at the GOA to assess the area after the rain and wind event of the previous day. I also want to examine the I noted the entire area was still being guarded by an armed guard from Element Security. I immediately noticed the previous day's weather had washed away some of the top layer of burned material. The previous days wind and rain had removed much of the top layer of burned material in many areas. I focused on examining the GOA for any evidence or indicators which had presented itself after the wind and rain. Upon examination of the area, I found metallic material in and around the GOA. I was unable to determine if the material collected was a naturally occurring component of the soil. I collected multiple pieces of the material for further examination. I then used a set on binoculars to examine the GOA for any previously unseen or exposed evidence or indicators not previously seen. No additional evidence or indicators were found. A magnet was used in the area to collect ferrous material. The Ferrous material found in the GOA was collected and booked into evidence. During the examination of an area outside the GOA, a foil type baking pan was found east of the GOA approximately 20 feet. (P-KM94, 95) The item was photographed and was determined to not be related to the fire cause.

Teams from both Edison and Spectrum arrived to assist in the collection of the lines. Multiple pieces of electrical and equipment were collected as well as multiple electrical and cable lines more than 500' feet. Once the lines were dropped, a visual inspection was conducted, and areas

OFFICERS INITIALS [redacted]

of the lines show damage as seen in the hanging position. Officer Joe Green Photographed the lines once dropped to the ground.

OFFICERS INITIALS_[redacted]

Cause Exclusions

Campfire – Excluded

No evidence of campfires in the area were found. No fire personnel or investigator assigned to the Fairview fire reported any evidence of a campfire. No reports of campfires in the area where reported.

Shooting - Excluded

During the investigation, an area approximately 500 feet from the GOA was discovered which was used for shooting. Multiple investigators were assigned to this area to assist in the processing of the shooting area. During the investigation and examination of items found, All the expended bullet casings were found to be tarnished and weathered. The casings were also covered in dirt and did not lay directly on the ground. Hundreds of casings were examined, and all appeared to have been in place for a significant time. Not a single casing was found which was believed to be recently fired.

Additionally multiple fire indicators were examined. All indicators found led the investigators to the GOA east of the shooting area.

Smoking - Excluded

A single empty burned pack of cigarettes were found in the shooting area. No cigarettes were found in or near the GOA. No cigarettes were found in the shooting area. No evidence of a smoking caused fire was found.

Debris Burning - Excluded

During a search of the GOA, the area surrounding, the main house and guest house, no burn piles, burn barrels or other evidence of debris burning was found. No reports of debris burning were reported prior to the fire.

Vehicles – Excluded

The area where the fire occurred was inaccessible to any motorized vehicles. The GOA and area surrounding was checked and no off-road vehicle or motorcycle tire prints were noted.

OFFICERS INITIALS [redacted]

Power lines – Included

During the origin and cause investigation, investigators were led to a GOA directly below a set of power lines which fed the guest house. Upon examination of the lines in place as well as after they were removed and brought down. two areas on two separate lines were found which show what appears to be missing and melted metal. (P-KM47,48) During a visual inspection of the power lines. A significant sag was present in the east conductor shown in picture P-KM44. Indicators were found below the power lines. The evidence and indicators show an electrical line caused fire.

Glass refraction – Excluded

The GOA was searched, and no evidence of glass was found. During the investigation, glass bottles were found which were determined to be outside the GOA and not a contributing factor to the fire's cause.

Incendiary – Excluded

The area was searched for evidence of an incendiary fire. No incendiary devices were found. No persons were reported in the area. The area of the GOA was on a hill side accessible through a locked and secured gated.

OFFICERS INITIALS [redacted]

Opinion and Conclusions

The fire's origin and cause were investigated for five continuous days. During the investigation involving multiple investigators, continued examination of indicators and evidence lead us to a single area which was later identified as the GOA. Several other areas and causes were considered and ultimately eliminated from the investigation. Upon examination of fire indicators, the origin was determined to be approximately 100 feet north of the guest house. During the investigation of the GOA, fire indicators lead us to an area almost directly under the power lines feeding the guest house. A visual inspection of the powerlines revealed damaged to multiple lines believed to be caused by lines touching. I also observed the east conductor to be sagging significantly more than the other lines.

Based on my training, experience, evidence found, and indicators examined, I believed the fires origin to be in the GOA identified and the fires cause to be from energized lines contacting during a period of wind which exceeded 20 miles per hour in the area.

CASE NAME
FAIRVIEW

DAY	MONTH	DATE	YEAR	COUNTY	REGION	UNIT	CASE NUMBER
MON	SEPT	05	2022	Riverside	CSR	RRU	CF222480003

On Monday September 5, 2022, at approximately 3:35 PM CAL FIRE/Riverside County Fire Department responded to a reported vegetation fire near the intersection of Bautista Road and Fairview Avenue in the unincorporated area Hemet, County of Riverside. Responding fire personnel accessed the property at [redacted] and reported a twenty-acre vegetation. A significant resource augmentation request was placed due to the initial acreage, geographic location, and observed weather and fire activity.

CAL FIRE Peace Officer John MAY and I arrived at the Incident Command Post located on Fairview Avenue and Bautista Road at approximately 4:33 PM and contacted Battalion Chief Andrew BENNETT for a situation status update on the fire. MAY and I entered the property at [redacted] from the north and began a systematic examination of the fire scene.

Upon entering the property, MAY and I observed a large metal building, a single wide mobile home, multiple detached covered storage areas, and an additional structure accessible upslope from the main structure. The lower structures appeared to be vacant upon arrival, with signs of recent inhabitance at the single wide and surveillance cameras on the corners of the metal structure. MAY and I continued to the upslope structure to check on the structure's occupancy status. May and I accessed the structure and confirmed the structure was unoccupied. Upon initial observation of the structure, MAY and I observed the powerlines originating from the lower metal structure ran upslope to the termination point on the pole located at the structure's access entrance. The lines were attached, and no downed lines were observed. I observed that there was no service drop to the structure and the electrical meter to the structure had been removed.

MAY and I began a scene survey walk in a south/southwest direction from the upper residence along the extension of the residence's access road through the burned interior of the fire towards the fire's right or northern most flank. I observed no signs of vehicle or foot traffic along the travel path. The fire in this area had already advanced significantly to the west with a sustained east wind influence. I observed several retardant drops downhill, west from the residence extending north

OFFICERS INITIALS [redacted]

towards the canyon floor. I observed, from the west looking down into the canyon floor, what appeared to be an established trail originating from the lower residence. Once on the northwest side of the fire, May and I contacted Fire Captain Anthony ALESSI.

ALESSI stated he was the third engine to arrive at the property at [redacted] and two access gates were closed and locked upon access. ALESSI stated both gates required the cutting of locks to access the property. ALESSI gave the first report on conditions of the fire relayed to dispatch as 20 acres, dangerous rate of spread to the west, with the potential for an extended fire. ALESSI accessed the fire from the dirt road originating from the lower residence to the point where fire engine access was halted due to road conditions. ALESSI and his crew took suppression activity on the right flank of the fire, identified as Division X initiating a hose lay from that point. I asked ALESSI to describe fire conditions upon his arrival. ALESSI stated in summation that fire was well established in the bottom of the canyon near a stand of oak trees for reference. ALESSI stated he observed what appeared to be a desk or bench in the general area. I visually inspected the general area and identified what appeared to be a desk and metal cabinet. I requested ALESSI have fire personnel place flagging around the area of interest to avoid disruption of the area from fire suppression operations. I asked ALESSI if any outbound traffic or people were present upon entry to the property, and he stated he observed neither. May and I continued to the right flank of the fire before walking back to the starting point at the upper residence.

May and I relocated to the area of the observed desk and metal container. Upon initial observation, the area had been flagged off per ALESSI'S request. I photographed this area as an area of interest (See P-KM-01). The area consisted of a foldable table, stool, and metal cabinet. Upon closer inspection of the area multiple shotgun shells and shell casings were identified and photographed (See P-KM-02,04). On top of the table were additional shotgun shells, wooden blocks, and small sandbags (P-KM-03,06). I photographed the metal cabinet next to the table and surrounding glass/aluminum beverage containers (See P-KM-05). I opened the cabinet to ensure nothing was actively burning inside, the cabinet had no fire involvement and contained a soiled paper towel roll and a layer of dirt and spider webs throughout. I took three photographs from behind the desk, oriented upslope towards the west/northwest (See P-KM-07-09). I inspected the area's established walking trail from west to east and observed/marked multiple shell casings of assorted calibers with white flagging. I observed a steel/rebar target stand and propane cylinders with holes consistent with shooting in the general area. Additionally, multiple shell casings were observed upslope from the

OFFICERS INITIALS [redacted]

walking trail. While inspecting the area, MAY and I were alerted to a request for CAL FIRE units to secure a scene on the incidents tactical law enforcement radio channel operated by the Riverside County Sheriff's Department (RSD). RSD dispatch advised of a fire fatality located in the Avery Canyon area west of our current location. MAY contacted CAL FIRE Peace Officer Mike NELSON and directed NELSON to respond to the location. I continued to inspect/identify and mark items of interest in the area as MAY relocated to coordinate NELSON'S response to the reported fatalities. As nightfall set in, I decided to flag off the area of interest to preserve the identified items within from damage or destruction due to fire suppression activities. The area was identified and communicated to fire personnel on the Division to not enter or disturb. MAY and I remained in the area to ensure the area was secure from entry and/or disruption.

At approximately 11:30 PM, MAY and I relocated to State Street and Domenigoni Parkway to meet with RSD representatives from the Central Homicide Unit, and RSD Hemet station detectives reference the fire death investigation. Upon relocating, ALESSI was advised to hold scene security of the established area of interest.

At approximately 12:00 PM, MAY, NELSON, and I met with the RSD contingent, and it was decided that the Hemet station Detective RHODES and Coroner's Office would be lead on the death investigation. It was determined we would meet at [redacted] at 7:00 AM on Tuesday, September 6, 2022. The scene was secured by an RSD deputy. MAY and I returned to [redacted] and ensured scene security was not compromised.

<u>Day Two – Tuesday, September 06, 2022</u>

At approximately 6:30 AM MAY and I relocated to [redacted] The property was approximately one mile east on [redacted] on the north side of the road (See APN report). The property is elevated from the [redacted] and [redacted] topographically shares the same canyon and ridge system as that located at [redacted] (See attached Google map image).

OFFICERS INITIALS [redacted]

Fire Progression Observations

The location of the [redacted] was located approximately 450 feet up the driveway on the southside in the dirt shoulder. The front of the vehicle was facing down the driveway towards the east. The leaves on the trees east of the vehicle had freeze indicating a fire front advancing from the east to the west. The east facing portions, exposed sides, of trees in the immediate area had indication of greater fire and heat exposure, white ash deposit, and damage differential greater than that of the west facing, protected sides, indicating a fire front advancement from east to west. Rocks east of the vehicle location had sooting and staining on the exposed sides indicated an east to west fire advancement. The vehicle sustained fire damage consistent with a fire front impact from the east. The front, east facing, rims of the vehicle were completely melted with molten flow downhill from the vehicle compared to the rear rims that were impacted but intact. The vehicle sustained greater burn time and temperatures due to the interior upholstery and plastic components creating higher heat release rates compared to the surrounding vegetation. [redacted] Trees and leafed vegetation west of the vehicle's location on the north and south side of the driveway also had west facing leaf freeze indicating a consistent and continuous east to west fire advancement through the area.

Based off localized weather conditions, observed fire behavior and fire indicators, I determined the fire that impacted the property at [redacted] is consistent with an advancing fire that progressed from the east to the west. The advancing fire enveloped the vehicle, [redacted] and continued to burn west along [redacted] Based on the consistency of fire indicators, I observed no indication that the fire that impacted [redacted] was an isolated or independent event separate from the Fairview Fire. These findings are further substantiated by victim and eyewitness accounts of the incident (See Death Investigation Report).

After completing the fire progression determination at [redacted] MAY and I returned to [redacted] CAL FIRE Peace Officer Wayne HOWERTON and Kelly BECKER met MAY and I at the location and MAY and I were relieved by BECKER and HOWERTON who remained to ensure scene security of the previously identified area and items of interest.

OFFICERS INITIALS [redacted]

At approximately 12:45 PM, MAY and I returned to the CAL FIRE office and began pulling dispatch records, property reports, and Riverside County Sheriff Computer Aided Dispatch (CAD) Records Management System (RMS) data. Based off the data obtained, I was able to obtain the property owner of [redacted] and several contact numbers for individuals associated with the property. Contact was made with [redacted], a caretaker of the property, and through him a contact number for [redacted] the property owner (See BECKER'S Supplemental Report).

At approximately 5:15 PM, HOWERTON advised the fire was continuing to envelop the property at [redacted] and the operational decision was made to allow the fire to advance on the property without fire suppression intervention. BECKER, GREEN, MAY, and I returned to [redacted] to ensure the property was not damaged, possibly destroying the possible video surveillance that was held on the DVR located inside the metal garage structure. BECKER contacted [redacted] and [redacted] and arranged for them to meet at the property to retrieve the surveillance data based off the predicted fire behavior (See BECKER Supplemental Report).

MAY and I returned to the area of interest identified on Monday, September 5, 2022, and MAY photographed the area and items of interest I had previously marked. This decision was made to not lose the ability to photographically document area/items with the potential to be disturbed or destroyed by the shifting fire behavior and advancement (See P-JM-01 through P-JM-28).

After viewing the surveillance video, it was determined that power went out at the property at approximately 3:30 PM on Monday September 5th and was restored at approximately 5:00 PM on Tuesday September 6th. GREEN arranged for [redacted] and an assistant to meet up the next day to retrieve a larger portion of surveillance video (See GREEN'S Supplemental Report).

At approximately 10:15 PM, CAL FIRE Peace Officers left the property at [redacted] and relinquished the scene security of the property to Element Security, a State contracted security company familiar with the security needed at active fire scene investigations.

OFFICERS INITIALS [redacted]

Day Three – Wednesday, September 7, 2022

At approximately 8:00 AM, CAL FIRE Officers met at [redacted] to complete the origin and cause investigation. It was determined that CAL FIRE Peace Officer Kory MCGRANAHAN would be the investigation lead. I briefed the officers involved of the preceding day's events and findings (See MCGRANAHAN'S Supplemental Report).

At approximately 1:00 PM, GREEN returned to the scene with a photograph taken from a residence in the area in the initial moments of the fire. The photographed suggested the fire began east of the identified area of interest, upslope, between the lower and upper residence (See GREEN'S Supplemental Report). The decision was made to split the officers and initiate a simultaneous investigation in the area identified in the newly acquired photograph.

Day Four/Five – Thursday/Friday, September 8-9, 2022

I attended a morning briefing at approximately 8:00 AM. After briefing, I began case report and photograph log documentation.

Day Six/Seven – Saturday/Sunday, September 10-11, 2022

I continued with report documentation until approximately 1:00 PM, when it was determined MCGRANAHAN, CABRAL and I would return to [redacted] I returned to the identified origin beneath the powerlines and inspected the area for possible further evidence discovery after localized rain and wind had impacted the area (See MCGRANAHAN'S Supplemental Report). At approximately 4:00 PM, CABRAL and I relocated to the site of a contracted aircraft, assigned to the Fairview Fire, that had crashed upon final approach to the Banning Airport. This request was made through the Fairview Fire Incident Command Team to provide scene security for the pending crash investigation. CABRAL and I remained at the crash site scene until relieved by CAL FIRE Peace Officers FAIRFAX and SOSA at approximately 8:00 AM, Sunday, September 11, 2022.

OFFICERS INITIALS [redacted]

Day Eight – Monday, September 12, 2022

[redacted]

At approximately 11:30 AM, I arrived at the Fairview Fire origin located at [redacted] and assisted with evidence collection (See MCGRANAHAN'S Supplemental Report). I left the scene at approximately 3:30 PM.

Overview

On Monday, September 5, 2022, the California Department of Forestry and Fire Protection / Riverside County Fire Department (CAL FIRE / RCFD) responded to the area of Fairview and Bautista Canyon Road, in the unincorporated area of Hemet, County of Riverside, for a wildland fire. The fire would later beknown as the Fairview Fire. CAL FIRE Peace Officer John MAY responded to the fire for the origin and cause investigation.

Assignments / Investigation

September 6, 2022

On Tuesday, September 6, 2022, at approximately 12:00 PM I was assigned to the Fairview Fire to assist with the investigation. MAY assigned me to review 911 audio. I reviewed the CAL FIRE Inter Agency Report and Dispatch Action Report and began to call reporting parties to gather information about the Fairview Fire. The interviews were recorded on my department issued audio recorder and downloaded onto a flash drive and later given to MAY. After talking to several witnesses, it was determined the Fairview Fire originated on the property located at [redacted]

On the evening of September 6, 2022, I met with the property owner of [redacted] who was identified as [redacted] agreed to give the investigation team access to a metal out building that contained the digital video recorder (DVR) for security cameras located on the property. [redacted] and his employee [redacted] arrived at [redacted] and gave the investigation team access to the metal out building. [redacted] accessed the DVR, and we began to review the footage. I noted the video footage stopped recording at approximately 3:30 PM on September 5, 2022. [redacted] called [redacted] the person responsible for installing the

OFFICERS INITIALS [redacted]

security cameras and equipment. [redacted] asked [redacted] why the footage would stop recording. [redacted] told [redacted] the only way the footage would stop recording would be because the system lost power. [redacted] and I were unable to download the video from the security system. [redacted] agreed to meet the investigation team the following day along with CAL FIRE RRU System Administrator Daniel BYRNES to download the security footage.

September 7, 2022

On Wednesday, September 7, 2022, at approximately 11:00 AM I met with [redacted] and BYRNES and escorted them to [redacted] I asked BYRNES if he could download footage from September 5, 2022, from all cameras from 11:00 AM to 4:30 PM. At approximately 11:10 AM BYRNES started to download the video from the security camera. The video download was completed at approximately 12:20 PM (the flash drive was later given to MAY).

[redacted] and I then drove to [redacted] to meet with [redacted] had a photo she found on a local community media platform. The photo was taken near the start of the FAIRVIEW Fire *(see attachment A)*. I asked [redacted] if she knew who took the photo. [redacted] told me the name on the post was [redacted] and the photo was taken from [redacted] I later reviewed my [redacted] notes and discovered I had contacted [redacted], the address [redacted] had given to me was located on [redacted]

I then contacted [redacted] and asked if he had posted photos on a local media site. [redacted] told me his wife [redacted] may have posted the photos. [redacted] agreed to meet with me and show me the photos his wife [redacted] and him had taken. I then drove to [redacted] address and was given copies of the photos *(see attachment B)*. In addition, I took photos with my department issued camera near the same locations [redacted] told me they had taken their photos *(see attachment C)*. The photos were later shared with the investigation team.

OFFICERS INITIALS [redacted]

September 8, 2022

On September 8, 2022, at approximately 1:00 PM the flash drive given to me by BYRNES with the security footage from [redacted] was copied on a department issued hard drive for review and the original flash drive was given to MAY as evidence.

September 9, 2022

On September 9, 2022, at approximately 2:00 PM I arrived at the FAIRVIEW Fire and photographed the location of the cameras *(see attachment D)*.

Video review

At the request of MAY, on September 10, 2022, I began to review the video security footage BYRENS had downloaded from [redacted]

The following is a summary of the review from what I observed and should not take the place of the actual security video footage.

The cameras are in seven locations attached on the metal out building *(see attachment D)*. Some of the cameras located on the building are motion activated and didn't continuously record. During the review of the camera footage, I noted a Green Toyota Tundra bearing CA [redacted] arrived at the property at approximately 12:02 PM. The driver of the vehicle was identified as [redacted] [redacted] is seen in the video driving to the west side of the metal out building unloading items from his truck and walking around the property. [redacted] stays at the property until approximately 12:52 PM and is observed leaving the property. There is no other significant events or persons observed coming or leaving the property. The video footage ends at approximately 3:30 PM.

September 12, 2022

OFFICERS INITIALS [redacted]

On Monday, September 12, 2022, at approximately 9:00 AM I met with the investigation team for evidence collection. MAY assigned me to photograph and document the evidence during the collection *(see attachment E)*.

10.5-SUPPLEMENTAL REPORTS BY OFFICER WAYNE HOWERTON

SUPPLEMENTARY INVESTIGATION REPORT

STATE OF CALIFORNIA
DEPARTMENT OF FORESTRY AND FIRE PROTECTION
LE 71 (REV. 7/2011)

INCIDENT NUMBER
22CARRU129712
CASE NAME
Fairview

DAY	MONTH	DATE	YEAR	COUNTY	REGION	UNIT	CASE NUMBER
Mon	Sept	5	2022	Riverside	CSR	RRU	22CF2480003

On Tuesday, September 6, 2022, at approximately 11:45 AM, I arrived at [redacted] in the unincorporated area of Riverside County known as Valle Vista, to assist with the Fairview Fire investigation.

While approaching the fire scene, I observed a Southern California Edison (SCE) vehicle. The vehicle had its boom up and a worker in the basket working on or observing a utility pole near the intersection of Fairview Avenue and Citrus Drive. Near the fire's heel, I met with California Department of Forestry and Fire Protection (CAL FIRE) law enforcement officers John MAY, Ken MEINKE and Kelly BECKER. I was shown the area thought to be the General Origin Area (GOA) and I assumed scene security so MAY and MEINKE could leave the scene.

At approximately 10:15 PM, I met with Triston MCMULLEN who is employed with Element Security and was requested to provide nighttime scene security. We met at the intersection of Fairview Avenue and Citrus View Drive. MCMULLEN was briefed on the expectations of him providing GOA security for the night. For his safety, I asked MCMULLEN not to go onto the property where the GOA was located and stay positioned at our current location. This request was due to the active fire in the area as the fire was approaching the property from the southeast. This location was safe and is the only road access into the GOA.

On Wednesday, September 7, 2022, at approximately 7:30 AM, I returned to the GOA and released MCMULLEN from scene security. Additional CAL FIRE officers arrived on scene for briefing at 8:00 AM. Those officers provided scene security as they investigated the scene. I was asked to review some video footage and assist CAL FIRE officer Joe GREEN with interviews of people who called 9-1-1 to report the fire.

After briefing, while waiting for GREEN to bring me a SD data card for footage review. Two SCE marked vehicles arrived on scene. Within one of the vehicles was Bernice CORDERO a Senior Advisor for SCE. During our conversation, she mentioned that she was on scene the

OFFICERS INITIALS [redacted]

morning prior (September 6) and stayed until about noon but never spoke with a CAL FIRE investigator. I was also told SCE performed work the prior morning on the utility pole (4943353E) next to the southwest corner of the large metal garage on the property. I was told the work performed allowed electricity to be returned to the garage, but electricity would not continue further south on the property. I then introduced CORDERO to MAY as MAY being the lead CAL FIRE investigator.

At approximately 11:20 AM, I received the SD data card from GREEN which I was asked to review. I was told the SD card was from a CAL FIRE security camera placed at the intersection of Fairview Avenue and Bautista Road. I reviewed the data to find all files associated with Channels 1, 3 and 4 had no video as only a blue screen was observed. Channel 2 had visible footage but was labeled as 22/09/04 with time frames ranging from 11:00:00 to 11:59:59. I did not review the entirety of the video due to the timestamps being over twenty-four hours prior to the report time of the Fairview Fire. The SD card was returned to MAY on the morning of September 8, 2022.

On Wednesday, September 7, 2022, at approximately 1:50 PM, I spoke telephonically with [redacted] and told me the following in summary:

[redacted] told me at approximately 3:30 PM an electrical power outage occurred for about thirty seconds. His neighbor then called him and said that the neighbor's home air conditioner (AC) was now not working. [redacted] went to his neighbor's house and got on the roof to help repair the AC. While on the roof and approximately five to ten minutes after the power outage, he noticed a plume of smoke rising from behind a ridge towards the south. He told me the smoke was east of Simpson Park and the smoke color progression was white to brown to black. He said within a matter of minutes "it got big". [redacted] took some photographs of the smoke plume and is willing to share them with investigators.

At approximately 2:45 PM, I spoke with Riverside County Sheriff's Department (RSO) Deputy's CURTIS and MONFREDA. We met at Fairview Avenue and Citrus View Drive due to this being the original location they observed the fire. I contacted them based upon the dispatch notes indicating RSO arrived to the fire prior to the fire department.

OFFICERS INITIALS_____

Together they told me about an hour and a half prior to the fire they were at the Hemet station. The power went out and they started to get alarm calls. They left the station to respond to calls. While they were in the Hemet High School area, they observed the smoke. They responded towards the smoke and when they arrived in the area they could not get any closer to the fire due to a locked gate at [redacted] They told me there was fire between the two structures (metal garage and upper house) on the hill. The left flank of the fire was already on the southern ridgeline, and they could not see the head of the fire because it was already up canyon and obscured by another hill.

On Friday, September 9, 2022, at approximately 10:50 AM, I spoke telephonically with [redacted] and told me the following in summary:

[redacted] told me she was in her backyard when she started to see white smoke coming up towards the southeast. She was unable to give a better location as she was unfamiliar with the area the smoke was coming from. She told me the smoke was originally white but soon turned black. She said the fire got big quickly and it was very windy at her home.

On Friday, September 9, 2022 at approximately 11:30 AM, I spoke telephonically with [redacted] and told me the following in summary:

[redacted] told me [redacted] She told me she was in her backyard when she observed smoke coming over the hill. She recalled it being dark smoke and said electrical power did not go out. She then handed the phone to her husband who told me the smoke was southeast of their location and it started off light colored. The smoke then turned dark. He told me it was a strong easterly wind at his home and the hill was blocking their view of the fire. They have initial photos of the smoke and are willing to share them with investigators.

At approximately 1:40 PM a SCE vehicle entered the area near the heel of the fire. I spoke with "Tony" who told me he was the SCE supervisor for contract companies performing under SCE. He was in the area evaluating SCE equipment for work to be performed. I advised him of the SCE equipment he was not allowed to manipulate due to the fire investigation. During our conversation, Tony told me the several spans of conductors from the road (Bautista Road) to the fire's location

were supposed to be replaced with new coated conductors back in May. The work had not been completed due to environmental issues.

10.6-SUPPLEMENTAL REPORTS BY OFFICER MOE BURKHART

SUPPLEMENTARY INVESTIGATION REPORT

STATE OF CALIFORNIA
DEPARTMENT OF FORESTRY AND FIRE PROTECTION
LE 71 (REV. 7/2011)

INCIDENT NUMBER
22CARRU129712
CASE NAME
FAIRVIEW

DAY	MONTH	DATE	YEAR	COUNTY	REGION	UNIT	CASE NUMBER
FRI	SEP	09	2022	RIVERSIDE	CSR	RRU	CF222480003

ASSIGNMENT/ARRIVAL

On Friday, September 9, 2022, I was on duty wearing full CAL FIRE law enforcement uniform, driving a marked CAL FIRE law enforcement vehicle. I was assigned as part of the investigation team for the "Fairview" fire burning in Hemet, Riverside County, California. My assignment for the day was to monitor the scene and activities of the CAL FIRE survey team that arrived to survey the area. I arrived at the scene at approximately 8:00 AM.

PROPERTY DESCRIPTION

The property [redacted] Hemet, Riverside County, California is approximately 100 acres with three main buildings. The first building is an approximate 100 feet by 100 feet metal building. Next to the metal building, to the east, is the second building, a single wide mobile home. These two buildings are the northern most buildings on the property. The third building is a conventionally built home, approximately 800 feet south and uphill from the metal building. This building is referred to by the property owner as the "Summer House." There is a dirt access road that runs south, uphill, from the metal building to the Summer House and beyond. The area I was assigned to monitor was the General Origin Area, determined by the investigation team to be the area between the metal building and the Summer House, west of the dirt access road and was approximately 7 acres. Traveling between the metal building and the Summer Home were two overhead powerlines, a communication line, and a messenger strand. These lines were affixed to power pole number 220028 and 22029S, with pole number 220029S being the final pole to the south and was located uphill near the Summer House.

OBSERVATIONS

At approximately 8:30 AM, I stood on the edge of the dirt road that led from the metal building to the Summer House. I stood directly under the power lines that ran between pole 220028 and pole 22029S, looking downhill and north toward Power Pole 22028. The wind blew out of the northeast. I felt and heard the wind increase in speed. I focused my attention on the east overhead conductor. I observed the conductor move with the wind. As the wind speed increased, the conductor blew closer

OFFICERS INITIALS [redacted]

to the messenger strand. During a wind gust, I observed the east conductor contact the messenger strand approximately seventy feet downhill and north of me.

At approximately 10:16 AM, during another increase in wind, I positioned myself as described above and observed the movement of the conductors. The east conductor again contacted the messenger strand. I video recorded the east conductor contact the messenger strand. (See IMG_1483.MOV)

At approximately 10:43 AM, during another increase in wind, I again positioned myself as described above and observed the movement of the conductors. The east conductor again contacted the messenger strand. This time, I was able to hear a reverberating, hollow, twanging sound when the two tensioned cables were in contact with each other. I again video recorded the east conductor contact the messenger strand while the wind blew. (See MVI_0001.MP4 and MVI_0002.MP4) I later downloaded the files and burned them to a DVD and secured them in CAL FIRE Riverside unit's evidence storage.

I continued to monitor the scene and powerlines. I used a department issued handheld weather meter to monitor the weather. The average wind speed was approximately 9.2 miles per hour out of the northeast, with gusts to 28.6 miles per hour.

At approximately 11:20 AM, during an increase in wind, I positioned the weather meter so I could see both the east conductor and the meter. I observed as the wind speed increased, the conductor blew closer to the messenger strand. At approximately 24 miles per hour wind speed on the meter, the conductor contacted the messenger strand and stayed in contact until the wind speed fell below 24 miles per hour.

WEATHER COMPARISON

I later compared the weather I observed and recorded in person to the weather recorded by weather station SCE Bautista Creek (156SE) for the same time frame on September 9, 2022. I also compared the weather on September 5, 2022, near the start time of the fire. I used the website https://mesowest.utah.edu/ to obtain the weather data. See the information below.

Weather taken by me using a handheld weather meter, September 9, 2022, 11:20 AM

Temperature: 82 Degrees

OFFICERS INITIALS [redacted]

Relative Humidity: 47.9 Percent
Average Wind Speed: 9.2 Miles Per Hour
Wind Gust: 28.6 Miles Per Hour
Wind Direction: 48 degrees, northeast

Weather from SCE Bautista Creek (156SE) September 9, 2022, 11:20 AM
Temperature: 82.3 Degrees
Relative Humidity: 47.14 Percent
Average Wind Speed: 11.9 Miles Per Hour
Wind Gust: 27.55 Miles Per Hour
Wind Direction: 43.26 degrees, northeast

Weather from SCE Bautista Creek (156SE) September 5, 2022, 3:20 PM (Approximately 10 minutes prior to the dispatch time of the fire.)
Temperature: 103 Degrees
Relative Humidity: 17.2 Percent
Average Wind Speed: 10.74 Miles Per Hour
Wind Gust: 20.53 Miles Per Hour
Wind Direction: 72.87 degrees, northeast

ASSIGNMENT

On Tuesday, September 13, 2022, I was on duty and conducted follow-up investigation regarding the "Fairview" Fire, Hemet, Riverside County, California. At approximately 11:30 AM, I contacted Western Riverside County Regional Conservation Authority (RCA) the owners of parcel [redacted] and [redacted] to determine how RCA interacted with utility companies if the companies need to access these parcels.

TLAXCALA CONTACT

I spoke to Monica TLAXCALA of the Riverside County Transportation Commission (RCTC). I recorded the conversation using my department issued digital recorder. I later downloaded the file and burned it a compact disk. The following is a summary of our conversation. TLAXCALA confirmed that Western Riverside County Regional Conservation Authority (RCA) owns the two parcels, RCA allows recreation like biking and hiking on existing roads that doesn't damage vegetation, TLAXCALA wasn't sure how RCA interacted with utility companies if they needed to access the property to and request an email from me with the information I was requesting. TLAXCALA provided me her contact information and I ended my contact with TLAXCALA at approximately 11:39 AM.

EMAIL CORRESPONDENCE

At approximately 11:57 AM, Tuesday, September 13, 2022, I emailed TLAXCALA at, MTLAXCALA@rctc.org, and requested the following information on parcel numbers [redacted] and [redacted]. How does your agency work with utility companies if they need to access onto or through the property to inspect, maintain, or repair their equipment that may be on the property. What is the notification or request process? Has there been any requests made in the last 12 months? If so, by whom and when?

OFFICERS INITIALS_[redacted]

At approximately 3:21 PM, Tuesday, September 13, 2022, I received a response from TLAXCALA. TLAXCALA asked me to contact Jonathan REINIG, Riverside County Parks and provided me his contact information. See attached email.

REINIG CONTACT

At approximately 10:42 AM, Wednesday, September 21, 2022, I contacted Jonathan REINIG at the telephone number provide to me by TLAXCALA. I recorded the conversation using my department issued digital recorder. I later downloaded the file and burned it a compact disk. The following is a summary of our conversation. REINIG told me utility companies send him a notification with the scope of work, what pole will be affected, a Google Earth file with where the poles are located, and how they will mitigate any sort of impact. He then reviews the information and either approves the work as notified or works with them to modify their plans to minimize damage to sensitive areas. Approximately two months prior, he approved work in the area, pole replacements and wire upgrades and said he would forward me the emails related to the work. At approximately 10:50 AM I end my contact with REINIG and forwarded the email I originally sent TLAXCALA.

EMAIL SUMMARY

After I spoke with REINIG on the phone, he forwarded me four separate email correspondence between Southern California Edison (SCE) and himself and responded to my email to him. See attached emails. The following is a summary of our email conversation. REINIG told me he had been in communication with SCE about work back in May, REINIG further explained the notification process, and he does not recall NOT authorizing any work that SCE wanted to do.

DISPOSITION

Please attach this supplementary report to the case CF222480003. All emails and audio were downloaded and burned to a compact disk and stored in CAL FIRE Riverside Unit's Evidence Storage.

Subject: Re: Parcel [redacted]

Warning: this message is from an external user and should be treated with caution.
Hi Officer Burkhart,

first off, I was mistaken about the location in question when we spoke on the phone earlier. I was thinking about the poles/SCE work to the west of Fairview avenue. But you are interested in the SCE work/communications east of Fairview avenue. So disregard what I said earlier about the work that was scheduled and postponed. That being said, I had been in communications with SCE about tree work and

pole replacements at Parcels [redacted] and [redacted] back in May. I will forward those communications to you immediately after I send this email.

To answer your specific questions; In recent years myself and RCA staff have been notified by SCE, or their contractors through their CROPS system whenever they need to do work on RCA lands (CROPS stands for Conserved, Reserved, and Open Space). Once we are notified of work that needs to occur on our lands, a two week hold is automatically placed on the scheduling of the work by SCE to give me time to asses potently natural resource issues. I typically look into the type of work to be done and if it will impact any endangered or rare species. In most instances, I then green light the project. In some cases I recommend alternate routes of travel, or additional biological protective measures then is standard for SCE work should it appear their work will adversely impact a protected species. I always stress the importance of keeping impacts to a minimum, because in years past we have had SCE contractors do serious, unnecessary damage to endangered species occupies habitat. Should impacts to habitats be unavoidable, then we would ideally work with SCE to develop a restoration plan before the impacts occur, but this has yet to happen since the CROPS system has been developed.

I'll send you four email chains that I had with SCE when they sought to do work on these parcels back in May. I know that SCE did complete some work on these parcels after the emails, but I can not say one way or the other if all the work discussed was actually completed.

I hope that answers all your questions. Please feel free to reach out again if you need anything else.

Cheers,

Jonathan Reinig

Subject: [EXTERNAL] Parcel [redacted]

Good morning,
Per our conversation, here is the email you requested.
I am looking for information on parcel numbers [redacted] Specifically, how does your agency works with utility companies if they need to access onto or through the property to inspect, maintain, or repair their equipment that may be on the property. What is the notification or request process? Has there been any requests made in the last 12 months? If so, by whom and when?

Thank you for your assistance.

good to hear. In that case I have no issues. But remember, this is under the premise that there will be no overland travel. I read this to mean that no vehicles will leave the dirt roads for any reason, including parking. We will head out and inspect the work once its completed. If I see crushed brush anywhere but the immediate vicinity of the pole, I will have to reach out to SCE Environmental Compliance for remedial action. I really don't want to have to do that, so please be sure to keep vehicles on existing roads.

Thanks,

Jonathan J. Reinig

Hi Michael,

question on one of these poles. For the southern pole (220024S), will crews be accessing it from the private road adjacent and to the west of it? I don't want any travel across the field from the east without a a plan for restoration of impacts laid out ahead of time.

Hi Jonathan,

This is notification that we have an O&M project occurring within CROPS (Conserved, Reserve, Open-Space, Preserve Sites) property. The project involves two pole replacements: 220024S and 1743029E. Both poles are adjacent to existing dirt roads and will not require Overland travel to vegetation trimming. Pole 220024S is scheduled for replacement on 5/9/2022 and construction would like to pre-dig ASAP. Pole 1743029E is scheduled for replacement on 5/18/2022 and the earliest pre-dig date of 5/13/2022. The work has been screened for archaeology, biology, wetlands resources. A kmz is attached.

The O&M project is scheduled to start construction/work activities on 5/6/2022.

Thank you,

Michael Hakimi
Consultant I, Scientist

Greetings,

The following O&M project occurs in CROPS (Conserved, Reserve, Open-Space, Preserve Sites) property. The estimated date of work is 05/12/2022 . The project involves vegetation management including trimming vegetation away from SCE power lines. Approved equipment includes trucks and hand tools. Tree crews are not allowed overland travel. All trim material will be brought off site, no material will lopped and scattered on-site. We recognize this work is located near biological and water resources. We will be conducting biological surveys for nesting birds, Arroyo Toad, Stephen's Kangaroo Rat. Some sites are assigned weather limitations for Western Spadefoot and Arroyo Toad. Additionally, some sites will have a water monitor on site while work is taking place.

A kmz with details of the work site requirements is attached.

Thank you,

Alicia McCracken

Subject: RE: [EXTERNAL] CROPS RCA Notif - Hemet [redacted] Crown Reductions

Hi Jonathan,

Actually, our ArcGIS data viewer system did not give a specific name for the property. It only described that the type of land/protection mechanism was a "conservation easement," the land was managed by Riverside County Regional Park and Open-Space District, and the property contact info was for you, Tricia, and Betsy. Sorry for the confusion, but it was not necessarily the designated "Riv Co Parks Conservation Easement," to my knowledge. From your description of the Bautista property, that seems to accurately align with the location given to us off of Bautista Rd.

The caller did not provide us the structure number in the intake, and only provided those coordinates for 12 eucalyptus (that were "growing together" and "within a 15 ft span"). He gave the descriptor of "south of Bautista Rd.," when asked for an address or follow up structure. At those coordinates, there appears to be a cluster of eucalyptus along the road, but it is hard to tell how many, given street view is not available. Given the scope of work and location descriptor of a 15 ft span, we concluded that the cluster we see has 12 trees, of which were all reported to be touching lines. Additionally, there is an existing Object ID for a lower priority trim at the same site for 1 eucalyptus, so this confirms the species given to us at that location.

To our knowledge, the coordinates I provided is where the eucalyptus trees occur, however, the tree crew will be sending us before and after pictures of the work. We can get a clearer picture for you then.

Best,

Hi all,

I'm a bit confused on this one, as Mia called it a Riv Co Parks Conservation Easement, but the coordinates she provided put teh work on the RCA's Bautista property. Furthermore, Mia's written description of the orange grove makes sense for the Bautista property, but I don't believe their is any Eucs at the point.

Mia, can you confirm the pole location and property ownership for us all please?

Cc: SCE Emergency <SCEEmergency@swca.com>
Subject: [EXTERNAL] CROPS RCA Notif - Hemet [redacted] Crown Reductions

Hi Jonathan, Tricia, and Betsy,
This morning, we received a call request an emergency tree trimming (crown reductions) on a CROPS conservation easement owned by Riverside County Regional Park and Open-Space District, with work scheduled to be completed on 05/31/22. The request came in as 12 P1 eucalyptus trees touching SCE power lines, causing a fire hazard and thus requiring an emergency trimming to mitigate it. The trees where work will be conducted is located South of Bautista Rd., Hemet, CA - all trees within a 15 ft span centered at [redacted] This location would be only accessed by the crew via the established road leading into the orange grove from Bautista Rd., and, therefore, no overland travel was necessary. No vegetation disturbance or ground disturbance would be needed to conduct the work as well.

Desktop review for bio and waters indicates no concerns at this location, and no monitoring was required.

No desktop review for cultural resources was required, given that the scope of work only called for non-ground disturbing tree trimming.

Crews were cleared with standard measures. KMZ of the trees' location are attached to this email.

Please let me know if you have any questions or concerns!

Hi Michael,

oh wow. that was off by a fair bit! Good copy and thanks for the update.

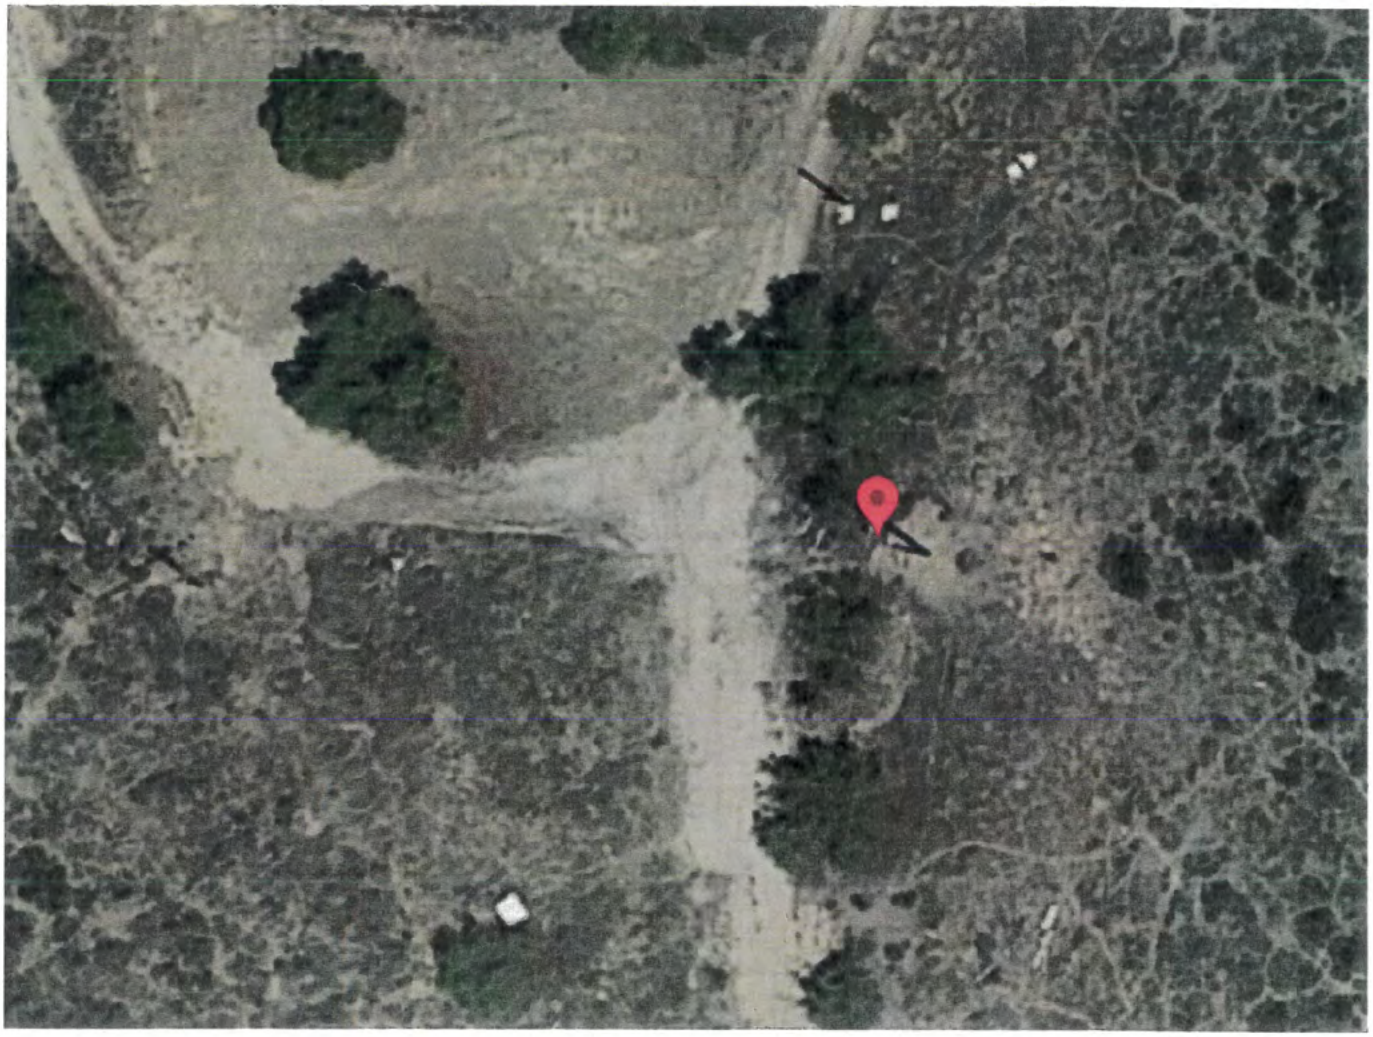
Hi Jonathan,

Construction sent us updated coordinates for pole 22875S: [redacted] We have scheduled a pre-construction survey for Stephens' kangaroo rat and coastal California gnatcatcher on 5/12/2022. Construction will not be clear to proceed with work until surveys have been conducted and results are negative.

Please let us know if you have any questions or concerns.



Thank you,

Michael Hakimi

Hi Jonathan,

Thanks for catching this! I believe the location in the KMZ is off and the pole is adjacent to the dirt road. Let me confirm with construction and I'll get back to you ASAP.

Best regards,

Michael Hakimi

Hi Michael,

I'm a bit confused on this one. I don't believe there is actually a pole there. There is a pole about 30 feet east right next to the dirt road, but at the point that you provided for 22875S, there is an old orange grove fan tower. I have included a photo that shows both the pole (right) and fan tower (left). The photo is taken looking north. Is the fan tower considered a pole?

Hi Jonathan,

This is notification that we have O&M project occurring within CROPS (Conserved, Reserve, Open Space, Preserve Sites) property. The project involves the replacement of pole 228755. Vegetation trimming is not required but Overland travel is required to access the pole. The work has been screened for archaeology, biology, wetlands resources. A kmz is attached.

We recognize this is in potential habitat for coastal California Gnatcatcher and Stephens' kangaroo rat species and will be implementing a Biological Pre-construction Survey for both species.

The O&M project is scheduled to start construction/work activities on 5/15/2022.

Thank you,

Michael Hakimi

Fairview		Time From: 1200 PM	Time To: 800 AM

7. Activity Log (continuation):

Date/Time	Notable Activities

LE 214
Activity Log

Purpose. The Activity Log (LE 214) records details of notable activities at any ICS level, including single resources, equipment, Task Forces, etc. These logs provide basic incident activity documentation, and a reference for any after-action report.

Preparation. An LE 214 can be initiated and maintained by personnel in various ICS positions as it is needed or appropriate. Personnel should document how relevant incident activities are occurring and progressing, or any notable events or communications.

Distribution. Completed LE 214s are submitted to supervisors, who forward them to the Documentation Unit. All completed original forms must be given to the Documentation Unit, which maintains a file of all LE 214s. It is recommended that individuals retain a copy for their own records.

Notes:

- The LE 214 can be printed as a two-sided form.
- Use additional copies as continuation sheets as needed, and indicate pagination as used.

Block Number	Block Title	Instructions
1	**Incident Name**	Enter the name assigned to the incident.
2	**Operational Period** • Date and Time From • Date and Time To	Enter the start date (month/day/year) and time (using the 24-hour clock) and end date and time for the operational period to which the form applies.
3	**Name**	Enter the title of the organizational unit or resource designator (e.g., Facilities Unit, Safety Officer, Strike Team).
4	**ICS Position**	Enter the name and ICS position of the individual in charge of the Unit.
5	**Home Agency** (and Unit)	Enter the home agency of the individual completing the ICS 214. Enter a unit designator if utilized by the jurisdiction or discipline.
6	**Resources Assigned**	Enter the following information for resources assigned:
	• Name	Use this section to enter the resource's name. For all individuals, use at least the first initial and last name. Cell phone number for the individual can be added as an option.
	• ICS Position	Use this section to enter the resource's ICS position (e.g., Finance Section Chief).
	• Home Agency (and Unit)	Use this section to enter the resource's home agency and/or unit (e.g., Des Moines Public Works Department, Water Management Unit).
7	**Activity Log** • Date/Time • Notable Activities	• Enter the time (24-hour clock) and briefly describe individual notable activities. Note the date as well if the operational period covers more than one day. • Activities described may include notable occurrences or events such as task assignments, task completions, injuries, difficulties encountered, etc. • This block can also be used to track personal work habits by adding columns such as "Action Required," "Delegated To," "Status," etc.
8	**Prepared by** • Name • Position/Title • Signature • Date/Time	Enter the name, ICS position/title, and signature of the person preparing the form. Enter date (month/day/year) and time prepared (24-hour clock).

ACTIVITY LOG (LE 214)

1. Incident Name:	2. Operational Period:	
CSR 505	Date From: 09/07/2022 Time From: 8:00 AM	Date To: 09/08/2022 Time To: 8:00 AM

7. Activity Log:

Date/Time	Notable Activities
09/07 8:00 AM	Arrived at scene and attended an operational briefing. I was assigned to the origin and cause team. Officer
	McGranahan was the team lead.
09/07 9:00 AM	As part of the Origin and Cause team, I examined the heel of the fire to determine the general origin area. I identified and
	analyzed macro and micro fire burn pattern indicators.
09/07 11:00 AM	While identifying fire burn pattern indicators, down hill from the road, north of the "Summer House," I observed
	overhead power lines. I examined the lines through binoculars. During my examination, I observed an area on the
	conductor that appeared to be damaged. The location of the damage was approximately fifty feet north, down hill,
	from the road to the "Summer House." I noted the area, and later relayed my finding to Officer McGranahan.
09/07 12:00 PM	Assisted with identifying, examining, and marking fire burn pattern indicators in the General Origin Area.
09/07 5:00 PM	Left the origin area but stayed in the general area and observed fire behavior.
09/07 7:00 PM	Left the scene.

7. Activity Log:

Date/Time	Notable Activities
09/09 8:00 PM	Arrived at scene. My assignment was to monitor the scene as CAL FIRE survey team surveyed the area.
09/09 8:30 AM	I was standing on the road to the "Summer House," directly below the power lines, looking downhill towards the second
	power pole. The wind was blowing out of the northeast and began to increase. I focused my attention to the east overhead
	conductor. As the wind increased the conductor blew closer to the "strand" that was fastened between poles several feet
	below the conductors. During a wind gust I observed the east conductor make contact with the "strand" approximately
	fifty feet down hill from me.
09/09 10:16 AM	I used my department issued cellular phone to video recorded the east conductor contact the "strand" while the wind blew.
09/09 10:43 AM	I used my department issued digital camera to video record the east conductor contact the "strand" while the wind blew.
09/09 10:44 AM	I used my department issued digital camera to video record the east conductor contact the "strand" while the wind blew.
09/09 10:45-11:25 AM	I monitored the weather using a department issued handheld weather meter.
09/09	I relayed my observations to the Officer McGranahan.
09/09 4:00 PM	Left the scene.

FAIRVIEW		Time From: 0800	Time To: 0800

7. Activity Log (continuation):

Date/Time	Notable Activities

LE 214
Activity Log

Purpose. The Activity Log (LE 214) records details of notable activities at any ICS level, including single resources, equipment, Task Forces, etc. These logs provide basic incident activity documentation, and a reference for any after-action report.

Preparation. An LE 214 can be initiated and maintained by personnel in various ICS positions as it is needed or appropriate. Personnel should document how relevant incident activities are occurring and progressing, or any notable events or communications.

Distribution. Completed LE 214s are submitted to supervisors, who forward them to the Documentation Unit. All completed original forms must be given to the Documentation Unit, which maintains a file of all LE 214s. It is recommended that individuals retain a copy for their own records.

Notes:

- The LE 214 can be printed as a two-sided form.
- Use additional copies as continuation sheets as needed, and indicate pagination as used.

Block Number	Block Title	Instructions
1	**Incident Name**	Enter the name assigned to the incident.
2	**Operational Period** • Date and Time From • Date and Time To	Enter the start date (month/day/year) and time (using the 24-hour clock) and end date and time for the operational period to which the form applies.
3	**Name**	Enter the title of the organizational unit or resource designator (e.g., Facilities Unit, Safety Officer, Strike Team).
4	**ICS Position**	Enter the name and ICS position of the individual in charge of the Unit.
5	**Home Agency** (and Unit)	Enter the home agency of the individual completing the ICS 214. Enter a unit designator if utilized by the jurisdiction or discipline.
6	**Resources Assigned**	Enter the following information for resources assigned:
	• Name	Use this section to enter the resource's name. For all individuals, use at least the first initial and last name. Cell phone number for the individual can be added as an option.
	• ICS Position	Use this section to enter the resource's ICS position (e.g., Finance Section Chief).
	• Home Agency (and Unit)	Use this section to enter the resource's home agency and/or unit (e.g., Des Moines Public Works Department, Water Management Unit).
7	**Activity Log** • Date/Time • Notable Activities	• Enter the time (24-hour clock) and briefly describe individual notable activities. Note the date as well if the operational period covers more than one day. • Activities described may include notable occurrences or events such as task assignments, task completions, injuries, difficulties encountered, etc. • This block can also be used to track personal work habits by adding columns such as "Action Required," "Delegated To," "Status," etc.
8	**Prepared by** • Name • Position/Title • Signature • Date/Time	Enter the name, ICS position/title, and signature of the person preparing the form. Enter date (month/day/year) and time prepared (24-hour clock).

10.7-SUPPLEMENTAL REPORTS BY OFFICER MIKE NELSON

SUPPLEMENTARY INVESTIGATION REPORT

STATE OF CALIFORNIA
DEPARTMENT OF FORESTRY AND FIRE PROTECTION
LE 71 (REV. 7/2011)

INCIDENT NUMBER
22CARRU129712
CASE NAME
FAIRVIEW

DAY	MONTH	DATE	YEAR	COUNTY	REGION	UNIT	CASE NUMBER
Mon	Sept	5	2022	Riverside	CSR	RRU	CF222480003

NARRATIVE:

On Monday, September 5, 2022, at approximately 6:30 PM CAL FIRE Officer John MAY contacted and requested me to respond to the area of Avery Canyon located within the area of the currently burning Fairview Fire. At approximately 7:30 PM I arrived at [redacted] and contacted Riverside Sheriff's Department (RSO) deputies. [redacted] I held scene security with RSO deputies.

At approximately 10:00 PM RSO CHU, Forensics, and Cororner arrived. I entered the scene with RSO units at approximately 11:00 PM. After observing the scene, it was determined to provide overnight scene security, and return in the morning during daylight.

On Tuesday, September 6, 2022, at approximately 4:15 PM, I was assigned to retrieve "pole-cam" surveillance video footage from a CAL FIRE camera located at Fairview Ave cross of Bautista Rd. At approximately 5:04 PM, I retrieved the SD media storage card from the digital video recorder (DVR), located at Fairview Ave cross of Bautista Rd.

At approximately 6:00 PM I began reviewing video footage captured around the date and time of the first report of the Fairview Fire. No video was captured during the time period I was reviewing and only a blue screen was observed. It was later determined there was a power outage to the area where the camera was located.

At approximately 7:30 PM I began to utilize outside agency License Plate Reader (LPR) capture cameras located in the same general area to observe all vehicles arriving and leaving the area. I did not locate any vehicles out of the ordinary during the LPR review.

SCOPE AND INTENT

The scope of this report is focused on the Fairview Incident (CARRU 129712) that began on September 5, 2022 in the County of Riverside, California.

The intent of the report is to provide an evaluation of fire and debris flow damage to structures within and proximate to the incident perimeter. This report attempts to include all habitable, commercial, utility and miscellaneous structures with a footprint greater than 120 square feet throughout the incident area. The report may evaluate or identify fire and debris flow damage to infrastructure, mobile equipment, or other miscellaneous parcel improvements as determined.

DISCLAIMER

The damage inspection data is approximate and for informational purposes only. The information and data contained in this report was collected using a systematic inspection process. Data collection concluded on September 14, 2022 at 1530 hours.

Fire and debris flow damage as well as poor access were major limiting factors for damage inspectors; therefore, a small margin of error is expected. The terrain, vegetation coverage, and large area affected by the fire and debris flow made locating damaged or destroyed structures very difficult. All the structures damaged or destroyed by the fire and debris flow may not be identified in this report due to these limiting factors.

Additionally, identification of structure types (such as single-story single-family residence vs. multi-story single family residence) was extremely difficult in some areas due to complete combustion of all identifying features. Damage inspection teams used their best judgment when assigning structure type classifications based on available features.

This report is based on the Firefighting Resources of California Organized for Potential Emergencies (FIRESCOPE) Damage Inspection Specialist (DINS) training curriculum. This report is not designed or intended to assess the value of individual damaged structures or determine the value of the total damage caused by the fire and debris flow. Data contained in this report is gathered through field inspections and available assessor's parcel information.

METHODOLOGY

CAL FIRE utilizes damage inspection criteria established by the Office of the State Fire Marshal to correlate data with California State Building Codes and Fire Safety Regulations. These criteria follow FIRESCOPE standards established for damage inspections as well as current FEMA guidelines where applicable. Data collection for each structure began with the visual confirmation by inspection teams. The following chart provides the category of damage levels used during the inspections:

Category of Damage	Definition	Examples
Affected (1-9%)	Minimal damage to the exterior and/or contents of the building. Building is habitable/usable and requires mostly cosmetic repairs.	Partially damaged shingles or siding, but roof structure is intact. Cosmetic damages such as paint discoloration, blistering or melted siding. Broken windows. Gutter damage. Damage to an attached structure like a deck, porch, carport, or patio cover.
Minor (10-25%)	Encompasses a wide range of damage that does not affect the structural integrity of the building. Building is not habitable/usable.	Nonstructural damage to roof components (e.g. roof covering, fascia board, soffit, flashing, and skylight). Nonstructural damage to the interior wall components to (e.g. drywall and insulation). Nonstructural damage to exterior components (e.g. door and windows. Substantial damage to exterior covering (e.g. siding, vinyl or stucco). Damage to mechanical components (e.g. furnace, boiler, water heater, HVAC, etc.).
Major (26-50%)	A building that has sustained significant structural damage and requires extensive repairs. Building is not habitable/usable.	Failure or partial failure of structural elements to include rafters, ceiling joists, ridge boards, etc. Failure or partial failure to structural elements of the walls to include framing, sheathing, etc.
Destroyed (>50%)	The building is a total loss, or damaged to such an extent that repair is not feasible.	Complete failure to major components (foundation, walls, roof, etc.). Two or more walls destroyed and roof substantially damaged. Only the foundation remains. The building will have to be torn down and rebuilt as it is unsafe.

DINS teams classified the damaged or destroyed structure into one of the following structure classifications:

Type	Structure Type
Single Residences	Single Family Residence-Single Story
Single Residences	Single Family Residence-Multi Story
Single Residences	Mobile Home - Single Wide
Single Residences	Mobile Home - Double Wide
Single Residences	Mobile Home - Triple Wide
Single Residences	Mobile Home - Motor Home (if used as residence)
Multiple Residences	Multi Family Residence-Single Story
Multiple Residences	Multi Family Residence-Multi Story
Mixed Commercial/Residential	Mixed Commercial and Residential
Nonresidential Commercial	Commercial Building - Single Story
Nonresidential Commercial	Commercial Building - Multi Story
Nonresidential Commercial	School
Nonresidential Commercial	Hospital (Medical)
Nonresidential Commercial	Church
Other Minor Structures	Utility or Miscellaneous Structure > 120 square feet
Infrastructure	Infrastructure (radio/cell tower/vault, bridge, etc.)

A structure is a habitable space when it appears to have permanent features that could be identified as a Dwelling Unit. A Dwelling Unit as defined in 2019 California Building Code (CBC) Chapter 2 Section 202 is a single unit providing complete independent living facilities for one or more persons, including permanent provisions for living, sleeping, eating, cooking and sanitation. Teams generally considered a structure permanent if the foundation was comprised of concrete or cinder block and was attached to that foundation. Temporary habitable structures, such as mobile homes, are included in this report and are classified separately from permanent habitable structures.

Structures greater than 120 square feet are included in this report. This threshold is the size at which a building permit is required for construction (CBC 105.2 Item 1). Only utility and miscellaneous structures greater than 120 square feet that appear to be permanent structures are included in this report.

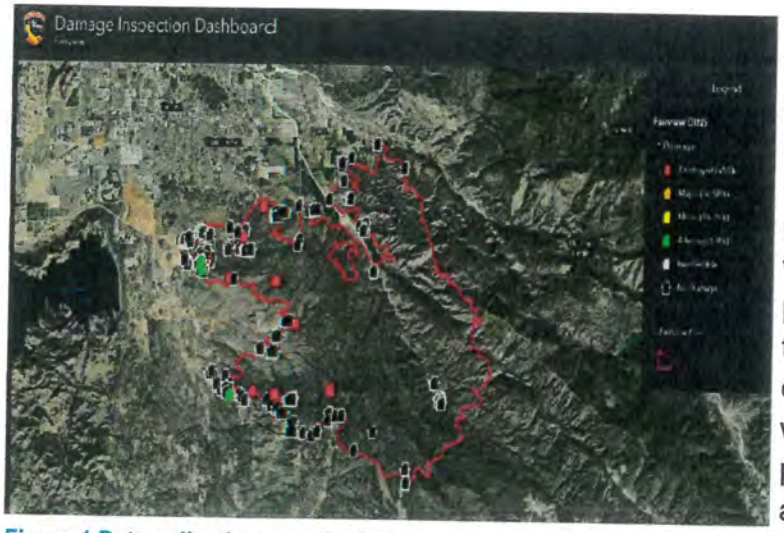

Figure 1 Data collection application

Wherever possible, all characteristics were collected that could allow for analysis of the fire and debris flow impact to the structure. These included vegetation clearance, roof construction, eaves, vent screens, window panes, exterior siding, decks, patio covers, car ports, fences, topography, and aspect. Relative comments by the inspection team were also included. Additionally, a photo was taken of each damaged and destroyed structure and included in the damage inspection report.

Damage caused by fire suppression activities is not included in this report and would be documented by the incident's Compensation and Claims Unit. Damage numbers are subject to change in the weeks ahead when owners who have a more detailed knowledge of their properties return. Additionally, due to complete combustion and a lack of identifying features, inspectors may have been unable to classify some structures into a specific structure type.

FINDINGS

In total, 44 structures were identified as damaged or destroyed by the fire on the Fairview Incident in Riverside County.

In total, 1 structure was identified as damaged by the debris flow on the Fairview Incident in Riverside County.

SYNOPSIS

Fire Damage

Category of Damage	Single Residences	Multiple Residences	Mixed Commercial Residential	Nonresidential Commercial	Other Minor Structures	Infrastructure	Total
Affected (1-9%)	3	N/A	N/A	N/A	3	N/A	6
Minor (10-25%)	1	N/A	N/A	N/A	N/A	N/A	1
Major (26-50%)	N/A	N/A	N/A	N/A	N/A	N/A	0
Destroyed (> 50%)	22	N/A	N/A	N/A	14	1	37
Total	26	0	0	0	17	1	44

Debris Flow Damage

Category of Damage	Single Residences	Multiple Residences	Mixed Commercial Residential	Nonresidential Commercial	Other Minor Structures	Infrastructure	Total
Affected (1-9%)	1	N/A	N/A	N/A	N/A	N/A	1
Minor (10-25%)	N/A	N/A	N/A	N/A	N/A	N/A	0
Major (26-50%)	N/A	N/A	N/A	N/A	N/A	N/A	0
Destroyed (> 50%)	N/A	N/A	N/A	N/A	N/A	N/A	0
Total	1	0	0	0	0	0	1

CONSTRUCTION MATERIALS AND METHODS

The following tables show the construction materials and methods for residential and commercial structures. Utility or miscellaneous structures > 120 square feet are not included.

Fire Damage

DAMAGE INSPECTION WORKSHEET (EXAMPLE)

State of California
Department of Forestry and Fire Protection
Revision Date: February 1, 2018

Damage Inspection Worksheet

Inspector First Name (print):	Inspector Last Name (print):	Inspection Date:
Incident Name:	Incident Number (e.g., CALNU_123456):	Incident Start Date:

Physical Address

Latitude (Degrees Decimal Minutes):	Longitude (Degrees Decimal Minutes): -	
Street Number (e.g., 1234):	Street Name:	
Street Type (e.g., Court, Hwy 50, Blvd):	Street Suffix (e.g., Apt 23, Bldg C, Lot 12):	
City:	State: CA	Zip Code:
CAL FIRE Unit:	County:	Community:

Structure Status

☐ Destroyed (>50%) ☐ Major Damage (26-50%) ☐ Minor Damage (10-25%) ☐ Affected (1-9%) ☐ No Damage

Where did the fires start on the structure (if Affected 1-9%): ☐ Roof ☐ Eaves ☐ Vent ☐ Siding ☐ Window
☐ Deck on Grade ☐ Deck Elevated ☐ Attached Patio Cover/Carport ☐ Attached fence ☐ Unknown

What started the fire (if Affected 1-9%): ☐ Direct flame impingement ☐ Embers ☐ Radiant heat ☐ Unknown

Structure defense actions taken by: ☐ Civilian ☐ Fire Department ☐ Both ☐ Unknown
(Explain in comments section: E.g., Engine Company, Dozer Line, Retardant, or Civilian actions)

Estimated vegetation clearance: ☐ 0-30' ☐ 30-100' ☐ >100' ☐ Unknown ☐ Not Applicable

Distance of propane tank to structure: ☐ 0-10' ☐ 11-20' ☐ 21-30' ☐ >30' ☐ Not Applicable

Topography: ☐ Chimney ☐ Flat Ground ☐ Ridge Top ☐ Saddle ☐ Slope

Aspect of the land to the structure: ☐ N ☐ NE ☐ E ☐ SE ☐ S ☐ SW ☐ W ☐ NW ☐ No Aspect

Structure Type

Single Residences: Single Family: ☐ Single Story ☐ Multi Story
Mobile Home: ☐ Single Wide ☐ Double Wide ☐ Triple Wide ☐ Motor Home (if used as a residence)

Multiple Residences: Multi-Family (e.g. apartments): ☐ Single Story ☐ Multi Story

Mixed Commercial/Residential: ☐ Mixed Commercial/Residential

Nonresidential Commercial: Commercial Building (e.g., Industrial, Manufacturing, Office, Retail): ☐ Single Story ☐ Multi Story
☐ Church ☐ Hospital (Medical) ☐ School

Other Minor Structures: ☐ Utility or Miscellaneous Structure > 120 sq. ft.

Infrastructure: ☐ Infrastructure (Essential Services) Agriculture: ☐ Agriculture

Number of units in the structure (if multiple unit structure): _____

Non-Habitable Outbuildings < 120 sqft Count: _____

Turn Page Over and Complete the Back

Construction Type
Roof Construction: ☐ Wood ☐ Asphalt ☐ Concrete ☐ Tile ☐ Metal ☐ Unknown
Eaves: ☐ Enclosed ☐ Unenclosed ☐ No Eaves ☐ Unknown
Vent Screens: ☐ Mesh Screen ≤ 1/8" ☐ Mesh Screen > 1/8" ☐ Unscreened ☐ No Vents ☐ Unknown
Exterior Siding: ☐ Combustible ☐ Ignition Resistant ☐ Unknown
Window Pane: ☐ Single Pane ☐ Multi Pane ☐ No Windows ☐ Unknown
Deck/Porch on Grade: ☐ Composite ☐ Wood ☐ Masonry/Concrete ☐ No Deck/Porch ☐ Unknown
Deck/Porch Elevated: ☐ Composite ☐ Wood ☐ Masonry/Concrete ☐ No Deck/Porch ☐ Unknown
Patio Cover/Carport Attached to Structure: ☐ Combustible ☐ Non Combustible ☐ No Patio Cover/Carport ☐ Unknown
Fence Attached to Structure: ☐ Combustible ☐ Non Combustible ☐ No Fence ☐ Unknown
Distance from Residence to Nearest Utility/Misc Structure > 120 sqft: ☐ <30' ☐ 30-50' ☐ >50' ☐ Not Applicable
Structures with No Damage

Comments:

APPENDIX A: STATUS OF AFFECTED PARCELS BY SITE ADDRESS

The Appendix A tables are based off the County Assessor's GIS parcel data. There may be inaccuracies with information shown and/or geospatial locations. When the GIS data did not show a site address, the table reflects an approximate field collected address and is denoted with "* Field Collected."

28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):

Minimal
Smoldering

DocuSign Envelope ID: 01FD558D-2D99-41B7-BDDC-A46F3FD13765

Incident Status Summary (ICS-209)

Incident: **FAIRVIEW**

Narrative:
Nuisance smokes may increase over the coming days due to the warming/drying trend. Stump holes, heavy material, hollow trees, and debris piles will be the greatest producer.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Chaparral (6 feet)
Brush (2 feet)
Short Grass (1 foot)

Narrative:
Large-diameter fuels remain drought-stressed while fine fuel moistures have increased with recent precipitation. Some decadent brush fields are present with little to no fire history over the past 20 years.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):
Damage inspections are complete.

1 cellular/communications infrastructure asset has been identified as destroyed.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	0	5	22
F. Multiple Residences	0	0	0
G. Mixed Commercial / Residential	0	0	0
H. Nonresidential Commercial Property	0	0	0

J. In Temporary Shelters	0		0
K. Have Received Mass Immunizations	0		0
L. Require Immunizations	0		0
M. In Quarantine	0		0
N. Total # Responders Affected:	2	0	2

33. Life, Safety, and Health Status/Threat Remarks:
On 9/10/22, while assigned to the Fairview incident, a Call When Needed (CWN) helicopter, crashed on approach to the Banning Helibase. [redacted]

34. Life, Safety, and Health Threat Management:

	Active?
A. No Likely Threat	X

Incident Status Summary (ICS-209)

Incident: **FAIRVIEW**

[redacted]

No additional sheltering needs are anticipated.

All Evacuation Orders and Evacuation Warnings have been lifted.

There are no remaining traffic control points.

There is a closure in place on the San Bernadino National Forest for the trails and area in and around the fire.

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):
Marine layer and onshore flow brought moderate to excellent humidity recoveries overnight. Temperatures were cool and in the 50s with light winds. Seasonably cool, but dry conditions will prevail on Saturday under sunny skies. Afternoon winds will be gusty up to 20 mph.

	Active?
B. Potential Future Threat	
C. Mass Notifications in Progress	
D. Mass Notifications Completed	X
E. No Evacuation(s) Imminent	
F. Planning for Evacuation	
G. Planning for Shelter-in-Place	
H. Evacuation(s) in Progress	
I. Shelter-in-Place in Progress	
J. Repopulation in Progress	
K. Mass Immunization in Progress	
L. Mass Immunization Complete	
M. Quarantine in Progress	
N. Area Restriction in Effect	X
O. Road Closure	
P. Trail Closure	X
Q. Area Closure	X

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Smoldering will continue in areas well interior and among heavy dead and down material. No fire spread is expected.**

24 hours: **Smoldering will continue in areas well interior and among heavy dead and down material. No fire spread is expected.**

48 hours: **Minimal smoldering will continue in areas well interior and among heavy dead and down material. No fire spread is expected.**

72 hours: **Very minimal smoldering is expected.**

Anticipated after 72 hours: **Very minimal smoldering is expected.**

37. Strategic Objectives (define planned end-state for incident):

Management Objectives:
- Provide for emergency personnel and public safety at all times.
- Ensure COVID-19 precautions and best hygiene practices are met at all times.
- Protect property, improvements, and infrastructure.
- Ensure coordinated, timely, and accurate release of public information.
- Foster and maintain relationships with all cooperators and stakeholders.
- Work collaboratively with all resources providing real-time incident intelligence to ensure accurate dissemination of information.
- Protect economic, natural, cultural, and heritage resources.
- Maintain fiscal accountability and keep costs commensurate with values at risk.

Control Objectives:
- Keep the fire within the current fire perimeter.

Incident Status Summary (ICS-209)

Incident: **FAIRVIEW**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Communities Impacted: Hemet, Anza, and Sage.**

Community Stability Threats: Disruption to the local economy persists but has been reduced with the elimination of evacuations and road closures.

Utility Infrastructure threats from the fire have been reduced but the potential of debris flow poses an ongoing threat.

Communication Infrastructure: Damage has occurred but the threat of additional destruction to communication infrastructure is reduced.

Historical and Cultural Resources: A variety of cultural resources are known within the fire area. [redacted] There are also known historic period roads and related features and historic era artifact scatters.

Watershed: Any runoff will impact the San Jacinto watershed.

T&E Species habitat: Nesting and foraging habitat for Swainson's hawk, bald eagle, western yellow-billed cuckoo, habitat for southern mountain yellow-legged frog, habitat for Peninsular bighorn sheep, San Bernardino kangaroo rat, southern rubber boa & Parish's meadowfoam plant.

Commercial resources: Destruction has occurred to commercial citrus groves but the further threat to commercial resources is reduced.

24 hours: **Same**

48 hours: **Same**

72 hours: **Same**

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **There are no critical resource needs.**

24 hours: **There are no critical resource needs.**

48 hours: **There are no critical resource needs.**

72 hours: **There are no critical resource needs.**

Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
1) critical resource needs identified above,
2) the Incident Action Plan and management objectives and targets,
3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

During the operational period, resources monitored all control lines around the fire perimeter, validated the control lines on all branches, and continued to mop-up and patrol.

DocuSign Envelope ID: 01FD558D-2D99-41B7-BDDC-A46F3FD13765

Incident Status Summary (ICS-209)

Incident: **FAIRVIEW**

Suppression repair is ongoing with a priority to prevent additional damage to critical infrastructure and sensitive cultural resources.

41. Planned Actions for Next Operational Period:
The planned actions for the next operational period are tactical patrol and suppression repair.

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): **28,307**

43. Anticipated Incident Containment or Completion Date: **09/17/2022**

44. Projected Significant Resource Demobilization Start Date: **09/11/2022**

45. Estimated Incident Costs to Date: **$37,783,468.00**

46. Projected Final Incident Cost Estimate: **$39,274,234.00**

47. Remarks (or continuation of any blocks above – list block number in notation):
For the duration of the incident, there will be a single 209 report submitted daily at 0600hrs.

The transition of Incident Command from CALFIRE IMT6 back to the Riverside Unit and USFS San Bernadino National Forest is scheduled for 0700hrs on 9/17/22.

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):

Statements and information included in this report are based on the best available information at the time of the report. I reserve the right to update and/or modify this report at any time, based on new or additional information becoming available.

Wildland Fire

Area Type: 4-Urban-wildland interface area
Wildland Fire Cause: Under Investigation
Material First Ignited: Undetermined
Factors Contributing to Ignition: Undetermined
Fuel Model at Origin: 02-B: Mature brush [6 ft.+]
Heat Source: Undetermined
Human Factors Contributing to Ignition: None

Investigation

Reported: 09/05/2022 15:35:22
Possible: Electrical Power; Miscellaneous
Possible - Explanation: See narrative.
Probable: None
Probable - Explanation: Under investigation

Investigation Attachments Included in Report?: Yes

Were there persons or property involved? (Victim, Witness, Subject): No

Narrative

Additional Narratives	Authored By	Authored Date

Synopsis:
On September 5, 2022 at approximately 1540, I was dispatched to the area of Fairview and Bautista RD for a reported vegetation fire. While responding I noted a large column of smoke coming from the Bautista Canyon area. Upon arrival I found E72 and E26 making access to the fire. Per FAE E72, access was difficult, and firefighters had to cut the locks off of 2 separate gates. FAE 72 noted that there were no persons or vehicles leaving the area of origin. Once access was made I established command. I noted that the fire was 20 plus acres of grass and brush, with a dangerous to critical rated of spread, and potential for an extended attack fire. The fire was spreading from the east to west.

Firefighters established an anchor point and started flanking the fire with fire hose and hand tools. Division Z was established on the right flank with FAE Otero and Division A was established on the left flank with FAE Schadt. B34 noted a structure threat to the Avery Canyon area and established the Avery Structure group, resources were diverted to assist with the structure threat.

B3116 arrived on scene and took over command.

I was not able to complete a preliminary fire investigation due to incident activity. The area of origin was flagged off and protected. Fire Prevention Specialist John May took over the fire investigation and the cause is still under investigation. Refer to FC John Mays Report of Origin and Cause.

ANTHONY ALESI 10/05/22

Acres Burned

State Responsibility Area: 14605
Local Responsibility Area: 10
Federal Responsibility Area: 13692
Total Acres Burned: 28307

Structures

Structures Damaged: 8
Structures Destroyed: 37

Weather

Weather Observer: KCAHEMET61
Weather Observation Device: Weather Station
Weather Observation Date/Time: 09/05/2022 15:54:34
Weather Station ID: KCAHEM
Weather Type: 10-Clear, less than 1/10 cloud cover
Relative Humidity (%): 22
Red Flag: No
Fire Weather Watch: Yes
Wind Direction: 6-Southwest
Wind Speed (mph): 3
Air Temperature (F): 107
Fire Danger Rating: 4-Very high fire danger

Conditions

Elevation (in feet): 1759
Relative Position on Slope: 2-Mid Slope
Aspect: 4-South

STATE OF CALIFORNIA

Notes:

1. Lidar scans of the electrical conductors and communication cables were collected from 70 setups spaced about 15 to 20 feet apart.
2. In order to distinguish the individual conductors and cables they are shown on subsequent pages in one color each.
3. Due to the gusty conditions the cables and conductors moved continuously during scanning.
4. The plan views of Detail 1 (Sheets 5 & 6) and Detail 2 (Sheets 7 & 8) show the horizontal movement of the cables & conductors.

FIRE WATCH LOG

DATE: 2022 / 09 / 10

TIME	INCIDENT NOTES
0816	A CALFIRE VEHICLE ARRIVED ON SITE. HE
	STATED HE WAS STEVE CABRERA. VEHICLE NUMBER
	F2441 (LP: [redacted]). CABRERA ADVISED ME THAT
	HIS TEAM NEEDED TO CHECK THE AREA. I ADVISED
	HIM THAT HOWERTON WAS ON HIS WAY TO
	THE SITE AAD THAT WE WERE ADVISED TO HAVE
	ANYONE WAIT FOR HIS ARRIVAL TO DRIVE
	FURTHER INTO THE SITE. CABRERA ASKED TO
	BE CALLED WHEN HOWERTON ARRIVED AND
	THEN DEPARTED FROM THE SITE.
0915	HOWERTON ADVISED ME THERE SHOULD NOT BE
	AN AREA CHECK. HE LOOKED AT THE BLACKENED
	AREA IN QUESTION BEFORE DEPARTING.
1252	STEVE CABRERA (F2441; LP: [redacted]) RETURNED TO
	SITE TO ADVISE ME THERE A GROUP TIGHTENING
	LINES OVER THE WEST HILLS AND MAY BE COMING
	DOWN TOWARDS THE SITE (93426).
1305	CALFIRE P3126, P3123 ARRIVED ON SITE
1348	CALFIRE P3122 ARRIVED ON SITE
1430	CALFIRE P3122, P3126, P3123 DEPARTED SITE
1600	SHERIFF's APPROACHED TO ASK IF ANYONE ON SITE
	NEEDED ANYTHING AND THEN DEPARTED
	(LP: [redacted])

FIRE WATCH LOG

DATE: 2022 / 09 / 08

TIME	INCIDENT NOTES
0952	AN ACCESS LOG WAS STARTED AT THIS TIME FOR
	AUTHORIZED PERSONS ON SITE AS PER HOWERTON.
1255	DIVISION T DROVE THROUGH TO ASSESS BURN ZONES
	AND SIGNS OF NEW FIRE SPREAD
1324	CALFIRE (#3469) DROVE THROUGH TO CONDUCT A
	WALK THROUGH OF THE BURN ZONES IN THE AREA
1808	SITE CLEAR OF ALL PERSONS SIGNED IN
1821	THREE VEHICLES APPROACHED THE PROPERTY.
	THE FIRST WAS IDENTIFIED TO BE WITH CALFIRE
	LOOKING FOR A DROP POINT. HE WAS DRIVING A
	GREEN DODGE RAM (LP: [redacted]). THE SECOND AND
	THIRD VEHICLES WERE MARKED WITH THE EDISON
	LOGO (LP: [redacted]; LP: [redacted]). I APPROACHED THE
	FIRST VEHICLE. HE ADVISED ME THAT HE WAS
	UNSURE OF THE DROP OFF POINT LOCATION AND WAS
	HAVING ISSUES WITH HIS RADIO. HE PULLED TO THE
	SIDE AND ATTEMPTED TO CONTACT A SUPERVISOR.
	I THEN APPROACHED THE SECOND CAR. THE DRIVER
	IDENTIFIED HIMSELF TO BE AN EMPLOYEE OF EDISON. I
	ADVISED THEM THAT THEY WERE ON PRIVATE PROPERTY
	AND WOULD NEED TO LEAVE. HE THEN ASKED ME IF
	THERE WAS A WAY AROUND THE EAST FENCE. I TOLD HIM
	THAT I DID NOT KNOW AND REPEATED THAT THEY NEEDED
	TO LEAVE PROPERTY. BOTH VEHICLES LEFT OUT THE
	DRIVEWAY. THE CALFIRE EMPLOYEE ADVISED ME THAT
	HE MIGHT NEED TO COME BACK AFTER HE FIXED HIS
	RADIO AND LEFT AS WELL.

10.18-CALIFORNIA PUBLIC UTILITIES COMMISSION-ELECTRIC SAFETY INCIDENT REPORT

From:	USRB
To:	Palmer, Leslie L.; SED-Gas Section-North; SED-Gas Section-South; SED-Electric Safety and Reliability Branch - South; SED-Electric Safety and Reliability Branch - North; SED Wildfire Safety and Enforcement Branch; compliance@energysafety.ca.gov
Subject:	FW: Electric Safety Incident Reported- Southern California Edison Company Incident No: 220905-15265
Date:	Monday, September 5, 2022 8:20:04 PM

From: webmaster@cpuc.ca.gov <webmaster@cpuc.ca.gov>
Sent: Monday, September 5, 2022 8:19:54 PM (UTC-08:00) Pacific Time (US & Canada)
To: USRB <usrb@cpuc.ca.gov>
Cc: paul.pimentel@sce.com <paul.pimentel@sce.com>
Subject: Electric Safety Incident Reported- Southern California Edison Company Incident No: 220905-15265

The Following information regarding this incident has been reported:

Reporting Date: 9/5/2022 8:13:48 PM
Incident Date: 9/5/2022 @ 3:40 p.m.
Reported By: Paul C. Pimentel, Principal Manager
Utility Name: Southern California Edison Company
Phone Number: [redacted]
Email Address: paul.pimentel@sce.com

Incident Location: Fairview Avenue/Bautista Road Hemet, Riverside County

Reasons For Reporting:
- Fatalities? No (Utility: , Others:)
- Names of Fatalities:
- Injuries? (Utility: , Others:)
- Names of Injured:
- Damage? No (Utility: , Others:)
- Interruption? (Total Customers: , Total Hours:)
- Operator Judgement? Yes
- Media Coverage? Yes

Cause of Incident: Unknown (Other Cause:)

Agencies on Scene:

Facilities Affected:
- Utilities Facilities: Sprague
- Voltage (KV): 12 kV
- Customer's Facilities:

DigIn Information:
- Excavator Name:
- Contact:
- Phone: (___)___-____

Incident Recovery:

- On Scene Date & Time: @ 00:00 a.m.
- Service Restored: @ 00:00 a.m.

Summary: Out of an abundance of caution, SCE submits this report as it involves an event that may meet the significant public attention and/or media coverage reporting requirement. The Fairview Fire was reported at 3:37 p.m. in the Hemet area. The cause of the fire is under investigation and has consumed over 500 acres and news reports reflect some structures have been damaged/destroyed. Our information reflects circuit activity occurred close in time to the report time of the fire. The investigation is ongoing.

10.24-NATIONAL TRANSPORTATION SAFETY BOARD-AVIATION INVESTIGATION PRELIMINARY REPORT

Aviation Investigation Preliminary Report

Location:	Banning, CA	**Accident Number:**	WPR22LA340
Date & Time:	September 10, 2022, 15:48 Local	**Registration:**	N242BH
Aircraft:	BELL HELICOPTER TEXTRON 206L-1	**Injuries:**	3 Minor
Flight Conducted Under:	Part 91: General aviation - Positioning		

On September 10, 2022, about 1548, a Bell 206L-1 helicopter, N242BH, was substantially damaged when it was involved in an accident near Banning, California. The pilot and two passengers received minor injuries. The helicopter was operated as a Title 14 *Code of Federal Regulations* Part 91 repositioning flight.

According to the pilot, he was contracted by a Cal Fire and was transporting two passengers to the Banning Municipal Airport (BNG) Banning, California. The pilot had established the helicopter on a final approach path to land between the runway and taxiway. While on approach, the helicopter made an uncommanded yaw to the right, to which the pilot countered with left anti-torque pedal application. The helicopter then began to yaw to the right again despite full application of left anti-torque pedal. The pilot announced that he lost his tail rotor and elected to increase his speed. He rejected an autorotation due to the multiple hazards beneath the helicopter. After the helicopter had turned about 180°, the pilot saw a back yard and maneuvered the helicopter toward it. As he neared the back yard, about 50 ft above ground level, the helicopter spun about its vertical axis. The pilot did not recall deliberately entering an autorotation and stated that it was more like he settled down in the back yard. When the helicopter got close to the ground, he applied collective to cushion the landing. The helicopter landed hard and rolled onto its side. The pilot turned off the fuel switch and exited the helicopter with the assistance from first responders. The two passengers assisted each other in exiting the helicopter.

Multiple witness reported that they saw the helicopter approaching the airport then spinning to the right, followed by a descent to the ground.

The helicopter came to rest on its left side. All major components were in the back yard near the main wreckage. Fragments of the main rotor blade were located on a nearby street. Examination of the fuselage by a representative of the Federal Aviation Administration and party members from the contractor revealed the tail rotor drive shaft had separated from the transmission at the first coupling. A fractured bolt and a washer were found near the end of the drive shaft. Two bolt ends and the associated nuts and washers were lodged in one end of the drive shaft assembly.

This information is preliminary and subject to change.

The helicopter was recovered to a secured facility for further examinations.

Aircraft and Owner/Operator Information

Aircraft Make:	BELL HELICOPTER TEXTRON	**Registration:**	N242BH

Wreckage and Impact Information

Crew Injuries:	1 Minor	**Aircraft Damage:**	Substantial
Passenger Injuries:	2 Minor	**Aircraft Fire:**	None
Ground Injuries:		**Aircraft Explosion:**	None
Total Injuries:	3 Minor	**Latitude, Longitude:**	33.916332,-116.85932

Administrative Information

Investigator In Charge (IIC):	Salazar, Fabian
Additional Participating Persons:	Robert Michaelson; Federal Aviation Administration; Riverside, CA Jake Marks; Cal-Fire Benjamin Berman; Cal-Fire; CA William Alex; Blue Sky Helicopters; CA
Note:	The NTSB did not travel to the scene of this accident.

This information is preliminary and subject to change.

10.25-GENERAL ORDER 95, 31.1: DESIGN, CONSTRUCTION, MAINTENANCE

31 Application

The following rules apply to all classes of overhead lines under all conditions.

31.1 Design, Construction and Maintenance

Electrical supply and communication systems shall be designed, constructed, and maintained for their intended use, regard being given to the conditions under which they are to be operated, to enable the furnishing of safe, proper, and adequate service.

For all particulars not specified in these rules, design, construction, and maintenance should be done in accordance with accepted good practice for the given local conditions known at the time by those responsible for the design, construction, or maintenance of communication or supply lines and equipment.

A supply or communications company is in compliance with this rule if it designs, constructs, and maintains a facility in accordance with the particulars specified in General Order 95, except that if an intended use or known local conditions require a higher standard than the particulars specified in General Order 95 to enable the furnishing of safe, proper, and adequate service, the company shall follow the higher standard.

For all particulars not specified in General Order 95, a supply or communications company is in compliance with this rule if it designs, constructs and maintains a facility in accordance with accepted good practice for the intended use and known local conditions.

All work performed on public streets and highways shall be done in such a manner that the operations of other utilities and the convenience of the public will be interfered with as little as possible and no conditions unusually dangerous to workmen, pedestrians or others shall be established at any time.

Note: The standard of accepted good practice should be applied on a case by case basis. For example, the application of "accepted good practice" may be aided by reference to any of the practices, methods, and acts engaged in or approved by a significant portion of the relevant industry, or which may be expected to accomplish the desired result with regard to safety and reliability at a reasonable cost.

Note: Revised January 13, 2005 by Decision No. 0501030 and January 12, 2012 by Decision No. 1201032.
